MOSLEM VS. MOSLEM

MERCILESS WARFARE IS NOW RAGING IN ALBANIA.

Turkish Soldiers Are Pitted Against Fierce Mountaineers and as Both Are of Ancient Fighting Stock Honors Are Very Evenly Divided—Causes of the Trouble—Albanians a Remarkable People.

It is not mimic warfare that is being carried on among the rugged fastnesses of Albania. It is real war—war to the knife and the knife to the hilt, with quarter absolutely excluded. Albania, where merciless slaughter now runs riot, corresponds territorially with ancient Epirus. The combatants are the fierce mountaineers, whose fighting qualities date back many centuries, and the Turks, the latter, too, men of the sword and of fanatical bravery. Both are followers of the Moslem faith.

At present Turkey is marshalling an army of 90,000 men to subdue these fierce mountaineers and she will need every soldier, with a few more beside. In a recent engagement, or series of engagements, on the plains of Kossovo, 5,000 men fell fighting on both sides. The orders on both sides were to "kill and spare none," and apparently they were carried out literally. To insure the fact that no quarter would be given the Turkish Government sent to the front only Moslem soldiers. It was afraid that Christian troops might be inclined to mercy and hence it is Moslem against Moslem in the ancient land of Epirus.

The causes of the present trouble lie to a large extent in the very character of the Albanians, who for centuries have lived in a condition of anarchy and warfare. Years ago the Moslem Albanians waged almost incessant warfare against the Serbs in those portions of Old Servia which are now included in the Turkish empire, and reduced those of them whom they did not kill to a state of practical helotage. The Serbs in Servia proper retaliated by harrying and expelling the Albanians whom they found in that kingdom, and those later, retreating to Albania, wreaked their vengeance upon the already hapless Serbs there. The Albanians were actually encouraged in these practices by the late Sultan, in the pursuance of his Pan-Islamic policy, and the result was that by the time Abdul Hamid had been deposed and a constitutional Government established at Constantinople the northeastern part of Albania was about as thoroughly lawless as any country can be. No taxes were paid and no authority was recognized.

With the annexation of Bosnia by Austria-Hungary, however, a better feeling arose between the Albanians and the Serbs, and a degree of peace was restored along the border. The new Turkish Government took advantage of this improvement of affairs by attempting to rehabilitate imperial authority and administration, and incidentally to resume the collection of taxes. In doing this it sent troops last summer and fall into Albania and this action was resented by Albanians and revolt broke out this spring.

TOWN COUNCIL.

Council Chamber,
June 17th, 1910.

Council met in special session on Friday morning to discuss the plans &c for the proposed Dundas street sewer. Mayor Simpson presiding.

On motion the resolution authorizing the street committee to secure plans for the sewer on Dundas street, also on Mill street, was reconsidered and by a subsequent motion was rescinded.

Mr. Waller moved, seconded by Coun. Ming, that the street committee be authorized to engage Mr. Wright to prepare plans and specifications for a trunk sewer from the Junction of Bridge and Dundas streets and up Dundas street to the sewer at West street, and as soon as this report is before the council that he prepare the plans, specifications and estimates for the sewers petitioned for on John street, Adelphi street and Dundas st. Ayes Alexander, Ming, Simpson, Waller, Hawley. Nay—Osborne.

On motion the action of the street committee in employing Mr. Wright up to the present time was indorsed. Council adjourned.

REGULAR MEETING.

Council met in regular session on Monday evening. Mayor Simpson in the chair.

Present—Reeve Alexander and Councillors Meng, Osborne, Steacy Hawley. The minutes of the last regular and special session were read and confirmed.

A deputation of ladies representing the W.C.T.U., before the council in accordance with an invitation sent to them to attend a regular meeting of the council and lay before that body their scheme in reference to the devise to the town by the late R. J. Wright. Mrs. A. W. Grange addressed the council on behalf of the deputation. The ladies of the town who are interested in the poor do not wish to have the property sold and the money used in providing for the dependent, but rather would prefer that the property be used for which it was devised, namely, a home for aged women.

The fact that the poor of the town had to be sent outside the municipality to be cared for was deplorable, but it was realized that under the present circumstances it could not be otherwise. The speaker advised that some time in the future and before the idea of selling the property was carried out, that the Mayor call a public meeting of the women of Napanee for the purpose of discussing the question. Also that an officer of the Woman's Christian Association, one who is familiar with the management of institutions of the kind in question, be secured to address the proposed meeting. The speaker was sure there were enough benevolent and philanthropic people in Napanee who would contribute sufficient for the maintenance of the home.

On motion of Councillors Meng and Steacy the Mayor was instructed to call a special meeting as per the request of the deputation at a time when in his good opinion he thought it advisable.

A communication was read from the Board of Railway Commissioners of Canada acknowledging receipt of letter from the town clerk in reference to the spur line of the Bay of Quinte Railway. Filed.

A communication was read from the County Clerk stating that the County Council at its June session had equalized the assessment of Napanee at \$800,000, and struck the rate at 5 mills per \$100.

J. L. BOYES,

NEWS NOTES.

Five lives were lost in a storm that swept over New York on Saturday evening.

It is estimated that on a hot day New York spends about \$1,500,000 on beverages.

Alexander Wiley, a Canadian, shot his wife at Pontiac, Mich., and then attempted suicide.

The thermometer touched 90 degrees in Winnipeg on Monday, the highest point of the season.

The C. P. R. has settled with its railway telegraphers by giving them all an advance of five dollars a month.

John Fee was killed by lightning near Windthorst, Sask., and Charles Emerson met a similar fate near Calgary.

Dr. John S. Booth of Montreal, was fined \$3 and costs for cuffing a man who wanted him to attend his sick father.

Count Zeppelin ran the first passenger airship from Friedrichshafen to Dusseldorf, a distance of 250 miles, Wednesday.

It has practically been arranged that the coronation of King George will take place about the middle of May next year.

There is a suspicion abroad that this sudden hot spell is due to the hot air Mr. Borden is giving out at the conservative picnics.

The Canadian Oddfellows finished their two-days' convention at Hamilton and elected Dr. Adam Thomson of Galt, Grand Master.

For the real thing in pure Manilla Horse fork Rope, made by the Plymouth Cordage Co. Get it at Boyle &

LETTER TO EDITOR.

Sir—Once more the drainage question has reached the talk, test and theory stage, with its accompaniment of large expenditure and small results. While a glance at the situation reveals the following facts: 1st—That the town of Napanee is very favorably situated as far as facilities for cheap and effective drainage is concerned, as all the streets running north and south have good fall to the river, and as the river must be the depository of all sewerage eventually, and it being provided with a tide rushing in and out, whether the drains empty above or below the swing bridge, makes little difference consequently the proper policy must be to utilize these streets for the main drains. And 2nd—As it is very important that the town should have high pressure and as pure water as possible furnished by the Water Works Co., the extension of their intake pipe up the head of the canal and river to a point east of the new bridge (thus getting clear of the town sewerage) is desirable.

Respectfully yours,
Citizen.

Napanee, June 16th.

ROBLIN.

The Ladies Aid of the Methodist Church intend having a Strawberry festival on the evening of Monday, June 27th.

We have been having a pretty fair touch of summer weather.

Song service in Methodist Church Sunday evening, 7.30 sharp, June 20th.

We are expecting good speakers and a good programme at our Strawberry festival next Monday, admission to which is 25cts for adults.

Miss Perle Spencer is in town.

Miss I. Hall is home, after being away for a week or more.

Lots of strawberries, ice cream and cake at the festival, June 27th.

Mrs. W. Exley and children at Mr. G. Richardson's.

COLEBROOK

Death entered our midst on the evening of June 11th, 1910, and suddenly called away one of our best known and highly respected women, in the person of Mrs. Ira B. Lake, widow of the late Ira B. Lake, who predeceased her about thirty years. She had gone to bed feeling in her usual health when she suddenly called her daughter, Mrs. Alfred Galbraith, with whom she had been visiting about three weeks, expiring a few minutes afterwards.

She was a faithful member of the Methodist church for about forty years, a loving wife and mother and a kindly, obliging neighbor. She was aged seventy-three years and five months. The funeral service was conducted at the Methodist church, Colebrook, by the Rev. Mr. Batstone, and was very largely attended. She leaves to mourn her loss one son, Maitland, on the old homestead, and one daughter, Mrs. Alfred Galbraith, and two step-children, Mrs. Charles Hicks, Harrowsmith, and Damon W. Lake, Sydenham; also two sisters, Mrs. Grant Day, Harrowsmith, and Mrs. Edward Richland, Oswego county, N. Y. The remains were laid to rest in the Harrowsmith cemetery.

TAMWORTH.

Owing to your correspondent being away and not having writing material with him, details of a pretty wedding, which took place on Tuesday, June 14th, are delayed. The contracting parties were Mr. Edward Donahoe, son of Mr. and Mrs. Patrick Donahoe, of

Mr. Borden is giving out at the conservative picnics.

The Canadian Oddfellows finished their two-days' convention at Hamilton and elected Dr. Adam Thomson of Galt, Grand Master.

For the real thing in pure Manilla Horse fork Rope, made by the Plymouth Cordage Co. Get it at Boyle & Son's, agents for this County.

Mr and Mrs. Thomas F. Hare and Miss Annie E. Scott, Mrs. Hare's sister, were killed by the Wabash express while driving over a crossing at Aylmer.

The special committee of the city council of Belleville which was appointed to look after the collection of taxes has ordered that the bailiff be put on the trail of all those who have unpaid taxes on the rolls of 1907 and 1908. The council is determined to make delinquent taxpayers pay up.

William A. Arthur, son of Capt. Gilbert Arthur, Picton, has something in the freak chicken line. In a recent hatching of young chicks there was one little fellow very distinguishable from all the rest. It had four legs, four wings and two necks. It was of the Black Minorca breed and a well-formed chick in every way. It died shortly after coming out of the shell.

Possibly to further mark the return of Colonel Roosevelt, his friend, the stork, made a flying visit to Boston and has left four infants in the home of Samuel Anderson, a shipfitter at the Charlestown navy yard. All the children, three boys and a girl, are expected to live. The mother of the children was Grace McLean, a Canadian, and is thirty-four years old.

A very instructive film was shown upon the white wall in a Peterboro nickel-olium on Wednesday. It dealt with the pest, the fly. This miserable mite was exhibited in detail and magnified many diameters. The audience saw how it was laid, an egg in filth, became a maggot in a few hours and then buried itself in earth, and later emerged wingless to soon proceed to fly and multiply. A fly sipping at a spittoon and soon after on the family sugar bowl, then feasting on rotten fish, and later on milk, revealed it in true light. Besides being a nuisance it is danger. Swat it whenever you get a chance.

Kodaks and Supplies.

Kodak means "photography with the bother left out." Anybody can Kodak it's so simple—the old way—you had to have a dark room but the Kodak has simplified it until a child can do good work. "Wallace's Drug Store" is the Napanee agency. Mail orders receive prompt attention. The 1910 catalogue will be here in a few days.

CHEESE BOARD.

The regular meeting of the Cheese Board, was held in the Council Chamber, Friday, June 17th.

Twenty-three factories boarded 2362 cheese, 1854 white, 508 colored.

TAMWORTH.

Owing to your correspondent being away and not having writing material with him, details of a pretty wedding, which took place on Tuesday, June 14th, are delayed. The contracting parties were Mr. Edward Donahoe, son of Mr. and Mrs. Patrick Donahoe, of Erinville, to Miss Mary A. Kennedy, daughter of Mr. and Mrs. William Kennedy, of Clareview. After the nuptial knot was tied Mass was celebrated by Rev. Father Carey, then the big bell tolled and the wedding march was played by the organist, which added greatly to the charm of the event. All started to the home of the bride's parents where a large number assembled in company with the bride and groom, accompanied by the Parish priest, all sat down to a well filled table, with a beautiful wedding cake in the midst of the very best eatables that could be produced, to which each and every guest paid tribute to the necessities supplied by appeasing their appetites. The String Band furnished music, and dancing was indulged in, which was kept up until morning, when all returned to their respective homes well pleased with the social event. The bride received many very valuable and useful presents, which was a living tribute to the high esteem in which she was held. May their days be pleasant and happy and prosperous through life.

A heavy thunderstorm passed around here on the 17th inst., accompanied by vivid flashes of chain lightning. So far no damage reported. The crops are looking fine. Clover crop is better than it has been in years. Fall wheat and rye are good. Diphtheria reported in the village at Mr. Paul's.

Mr. James Busby, Shoemaker of this village, dropped dead suddenly a few days ago. Heart failure is supposed to have been the cause. The remains were taken to Reedville for interment. Mr. M. Donahoe, of Tamworth, has put up very fine frame barn for Mr. Edward McGuire, and he is also putting up a large kitchen for Mr. Thos. Garrett. The few carpenters that are here are kept busy.

See our windows for bargains. Royal Shoe Store.

WATER POWER FOR TWENTY-FIVE DOLLARS A H. P.

(Kingston Whig)—J. H. Larmouth, of the Seymour Power and Electric company, limited, Campbellford, told the city council, Tuesday evening, that his company was ready to build a transmission line to Kingston, and in twelve months would supply this city with 3,000 horse power, or all that Kingston requires, and he thought that 2,000 horse power would be all that this city could handle.

Mr. Larmouth wanted to know if the council would enter into an agreement with the Seymour company, and was told by Alds. Rigney and Elliott that the council would have first to receive the company's proposal in writing. When that was received, it would be fully considered. Mr. Larmouth said that his company would like to get the privilege of distributing power in Kingston.

Ald. Elliott stated that the feeling of the light, heat and power committee on the matter was that any power from water falls that was brought into the city must be delivered at the city's switchboard, and the city must distribute it itself. He would never favor anything else. It would not do to allow a company to come in and establish a power business in opposition to the city's plant.

Mr. Larmouth said that all these details would have to be considered. He would see that his company's proposition was made in writing, so that it could come before the next meeting of the city council. The Seymour company, he said, was prepared to give Kingston power for twenty-five dollars a horse power.

The Montreal men who distinguished themselves with bravery at the Herald fire are to receive medals.

Rooms, bathroom, cedar, large cistern, well at door, large orchard and variety of berries, good drive house, barn and shed—a mile and a half from Napanee on Palace road. Enquire on premises. Also Piano for sale. MRS. G. VANALSTINE. 13th

40 FARMS FOR SALE in Napanee and Belleville districts. Many of these are valuable farms, and at right price. Call at once or write for list. We can suit you, and you will save time and money. Also some good town properties. W. G. H. BROWN, Real Estate. Opposite Royal Hotel, Napanee.

FARM FOR SALE—100 acres—Valuable and desirable farm in Ernestown Township, lot No. 13, 7th concession, six miles from the town of Napanee, and about three miles from Newburgh. Farm is well fenced, never failing crop through centre of farm. Good frame house and new barn, 74 acres under cultivation, 74 acres woodland. Apply to W. G. BAUGHAN, at Gibbard's sale rooms, Napanee.

FOR SALE—The house and lot situated on corner of John and 1stabella streets, formerly occupied by the late Miles Hawley, deceased, and now available for a residence. Large bath tub, one phantom in good repair, one large walnut office desk, a complete set of tools of trade. For full information and particulars apply on the premises. Also some jointed fish poles, spoons, lines, etc., for sale. 23 d.

As John Titz, Coryberville, was examining a crabapple tree, on his farm, he found three blossoms of perfectly-formed roses, having five rows of petals. They are pure white and each set above five green leaves. He picked one, but will carefully watch the others to see what they will bring forth.

With the guns of two forts and a battleship booming out a presidential salute, Theodore Roosevelt came into his home port, after an absence of fifteen months, during which he has journeyed more than 6,000 miles, and is back from Elba on the anniversary of the battle of Waterloo. He received a welcome such as no other private citizen has been vouchsafed in America. City state and nation waited to do him honor, while Rough Riders whooped their joy.

Stand and Deliver

I

Lady Peggy pursed up her mouth and glared out of the window, tapping her fan upon her mitten fingers, and her high-heeled shoe upon the floor.

"Of course, my darling," expostulated Mr. Justice Funnell, after an icy pause, "if you won't enter into the spirit of the jest——"

"Jest! Do you call this a jest, crawling along, frozen to death, in a ramshackle station-fly, when we might have gone in the motor? Here are we, dressed up like two eighteenth century guys——"

"Darling!" protested the judge, smoothing out his Georgian ruffles.

"Well, and what else do you flatten yourself you look like, pray?" demanded Lady Peggy, regarding him acidly. "You, a judge, lending yourself to all this fiddle-faddle! And all for the whim of an old-fashioned squire, who lives miles from anywhere, and can find nothing better to do than to provide freak house parties for his friends."

The fly was crawling at a jog-trot over the waste, known locally as Gibbet Hill, from the fact that in years gone by it had been regarded as "a good pull-up" for highwaymen.

"Stand and deliver!"

A horseman had come plunging down the bank into the road just ahead. The fly pulled up with a jerk, wheeled half round, and began to back resolutely into a furze-bush.

A horse's head had emerged from the darkness, and above it a dapper figure in three-cornered hat and riding-boots, with a red coat, half hidden by a long, black cloak. From behind a crepe mask two blue eyes twinkled.

"Your money, or your life!" demanded the horseman.

"My money, or my life?" echoed the judge. "Why, this—this must be one of Squire Careless's little surprises."

The mask had slipped from the handsome, clean-shaven face. The rider recovered his disguise in an instant, but the judge had seen enough.

"Why, you young dog!" he laughed. "You and I have met before. Now, let me see. Why, of course, you're young Dick Careless!"

"At your service!" laughed the highwayman. "Dick Careless, in the role of Dick Turpin, for one night only."

"Excellent!" chuckled the judge. "You hear that, Peggy? You remember Jack's nephew, Dick, who went out to Mombasa? Well, here he is, back again. Jove, how he's filled out, too! How many years is it since you left England? It must be eight, at least."

"Nearly nine, sir," replied Dick. "Nine years, all but a month, or thereabouts."

"Dear me! And now you've turned highwayman, and hold up honest folk on the King's highway?"

"Vae!" laughed Dick cheerily.

all the evening. This other fellow must be an impostor!"

Just then another carriage arrived at a fast trot, bringing tidings that the highwayman was still at his work and, on the assurance of the guests who had already passed through his fingers, was reaping an easy harvest.

"The scoundrel!" roared the squire. "The impudent rogue. Major Whinnel, you'll lend a hand in the hunt, and Lord Uskdale, and Claythrop, and half a dozen of you. You know where the gun-room is. There's a brace of revolvers there, and half a dozen twelve-bores. The rest must take hunting-explosives. I'll have horses round for all in a couple of minutes."

Mr. Justice Funnell was not one of the volunteers called upon by name by Squire Careless, but he secured a mount, nevertheless, and joined the gallant muster, determined to retrieve his mistake somehow, or break his neck in the attempt.

Gibbet Hill Heath stretches almost to the gates of Careless Hall. The hue-and-cry pulled off the road here, for the going was easier, and the turf deadened the thunder of the hoofs.

Without slackening rein, the squire issued his orders for the chase. Major Whinnel, with two others, wheeled to the left, in case the main body bolted the quarry in that direction. Lord Uskdale, with three gallants, struck out for Five Elm Gap, as a line the fugitive would be more likely to take. The squire, the judge, and the rest held straight on.

Half a mile away, the lights of a carriage could be seen moving swiftly over the heath. Suddenly they came to a standstill. So they were not too late, after all. Dick Turpin the Second was still at the receipt of custom.

III.

A pistol-shot rang out sharply. Evidently, some guest had disputed the night-rider's demands, and the villain had unmasked.

The squire rose in his saddle at the shot and let out a rousing "Tally-ho!" It was answered by a defiant yell, and a fainter cry for help.

At the same moment the moon peeped from behind a low-lying cloud. And against the pale light they saw a black figure spurring along the sky-line.

It was heading for Five Elm Gap. The judge was a light weight, and his horse a good one. He was outstripping the squire fast, for the latter rode at fourteen stone.

Five Elm Gap lay just ahead, and low down against the glint of moonlit sky he could make out the blurred outline of the fugitive.

"Halt, or I fire!"

Lord Uskdale and his right flankers had cut the line of retreat just in time.

The fugitive wheeled sharply to the left. Straight for a hedge he flew. Here a second challenge greeted him. A gun-barrel gleamed in the moonlight. Up flew the fugitive's hand.

Bang—bang! The highwayman had fired twice. There was a savage yelp in response, and then the flash of a sporting gun from the spinney. The mare reared upright on her haunches, and the fugitive slipped from the saddle as she rolled backwards.

TEMPERANCE IN IRELAND

"CATCH MY PAL" MOVEMENT IS SPREADING.

Had Its Origin in a Chance Encounter—Has 120,000 Members in Ireland.

Ireland was the birthplace of the first great temperance movement when the Father Matthew crusade was started more than a generation ago, and to-day she has again the honor of giving the whole kingdom a lead in the matter of temperance. The "catch my pal" movement which began in Armagh less than a year ago has spread to England and Scotland and promises to have an effect there quite as revolutionary as it has had in Ireland.

Branches of the organization have just been established in London, and the founder of the movement, the Rev. R. J. Patterson of Armagh, is in so great demand to start fresh branches that it is evident he will soon have to give up his pastorate and devote his whole time to the work.

"CATCH MY PALL" MOVEMENT

The "catch my pal" organization which now has 120,000 enrolled members in Ireland owes its origin to a most trivial incident. Mr. Patterson, who is a Presbyterian clergyman, had been lecturing on temperance in his church in Armagh,

but the lectures were just part of his ordinary work and he had no idea that they were to be the starting point of a great wave of reform. On July 13, 1909, he was going along the street when he noticed six men lounging about a lamp-post. One of them came over and spoke to him. "There are five men, your reverence," he said, "that you ought to get to take the pledge." The incident struck Mr. Patterson as peculiar and he crossed the street and had a chat with the men. The result of it was that they all called at his house later in the day and expressed their willingness to become total abstainers.

Mr. Patterson was pleased, of course, but he pointed out to the men that they ought to do what they could to get others to follow their example. "All right," said one. "I know a pal I can catch."

ADOPTED A LABEL.

Another thought that he also could "catch a pal" and before they left everyone of them had promised to bring in at least one "pal." The expression struck Mr. Patterson and he determined to adopt it as the label of his movement, which from that day spread with amazing rapidity. The influence which it exerts can be

judged from statements made at Lambeth Palace, London, the other day at a conference of the bishops of the Anglican Church. The Right Rev. Dr. Crozier, Bishop of Down, Connor, and Dromore, declared that he could name dozens of towns in the north of Ireland where there had been no petty sessions this year on account of the influence of the "catch my pal" movement.

One of them is Armagh, and it is common knowledge that in the past the ecclesiastical capital of Ireland has not been notably free from

BURY KING'S WIVES ALIVE.

Congo Natives Eat Human Flesh and Never Wear Clothes.

Converting man eaters into man lovers and savors is the task of Rev. Gustav W. Stahlbrand, a Swedish Baptist missionary in the Lake Tumber district, upper Congo, has undertaken. The tribe among which Mr. Stahlbrand is working numbers a quarter of a million. This is only one of many tribes in Africa. Each has its own distinct language.

The people of this district are intelligent and when once they begin to accept Christianity they grow by leaps and bounds. One young man of 20 learned to read and write and do simple arithmetical problems in six months.

"A man's wealth in the Congo is known among the natives by the number of wives he possesses," says Mr. Stahlbrand. "The kings, of which there are eight or ten in each village, crowned by the people, have 300 or more wives. The cost of a wife is 200 brass rods, but a wife so sold may be bought back again by her relatives. Another way of paying for her is by 8,000 or 10,000 rods, or the equivalent of blankets, knives, pieces of cloth, hoes, axes, beads, fish-hooks, darning needles and a bag of salt. When a wife is thus purchased she can never go back and the relatives who are paid this enormous price must furnish another wife when the first one dies, and so on forever to the relatives of the first owner."

"When a king grows old he is throttled to death. Then a number of wives and natives are selected to dig his grave. When the grave is ready the wives and natives are put in the grave alive and the dead king on top of them. Then the people throw stones into the grave until it is filled up. Going back to their village they select more wives and more slaves and these are beheaded and cooked for a feast in which all the people of the village partake and which lasts six days. The only other time that the people eat human flesh except at the death feast of a king or very wealthy man is when there is a famine.

"The land is very productive and the women raise the crops and do all the work except clearing the land and building the houses. This the men do. The climate is one of the hardest in the world. The humidity is registered at 95 degrees the year around, except a night or two in June when it may go down to 75. In consequence of this the people have no real need of clothing and so wear none. They never take baths in water, but rub themselves with palm oil and when they wish to dress up they put on camom wood powder, which is red and has a slightly fragrant odor. The average life of a native is 35 years, but until recently the race has propagated very rapidly. King Leopold's cruelties and the sleeping sickness has checked the growth."

ADOPTED A LABEL.

The influence which it exerts can be judged from statements made at Lambeth Palace, London, the other day at a conference of the bishops of the Anglican Church. The Right Rev. Dr. Crozier, Bishop of Down, Connor, and Dromore, declared that he could name dozens of towns in the north of Ireland where there had been no petty sessions this year on account of the influence of the "catch my pal" movement.

One of them is Armagh, and it is common knowledge that in the past the ecclesiastical capital of Ireland has not been notably free from

ENGLAND IN EGYPT.

Revenue 20 Times as Great as When British Control Began.

When England assumed sole control in 1882 Egypt was still bankrupt, with a public debt of more than \$500,000,000 and an income insufficient to pay the interest and

"Nearly nine, sir," replied Dick. "Nine years, all but a month, or thereabouts."

"Dear me! And now you've turned highwayman, and hold up honest folk on the King's highway?"

"Yes," laughed Dick cheerily; "and not only hold them up, but rob them, too. Uncle is not the man to do things by halves usually, but tonight is the exception. This is the first half of a little joke of his. The second takes place at the Hall, on the stroke of midnight. According to his instructions, I am to take a ring from every lady—a diamond one, for preference, and the purse of every gentleman."

"Well, well!" said the judge merrily. "Time is money. I suppose, particularly at your trade, and I see a whole string of carriages coming up the road. If you must have my purse, take it; but I'll take jolly good care that everybody else pays up, too. Come on, and I'll help you to collect your ill-gotten gains. Ahoy, there, you lubbers! Your money, or your lives!"

Gilbert Hill had been the scene of many a dark and awful deed, no doubt, but none so strange as this, with Dick Turpin the Second, masked and debonair, holding on a string of carriages at the posted point, while a judge of the Court of Appeal relieved the fair occupants of their rings, and the bewigged gen'ry of their purses.

It was a rattling good joke, of course, and Squire Careless' guests entered into the spirit of it thoroughly.

All except Lady Peggy. If she had not put her high-heeled sheath down most emphatically, Mr. Justice Funnell would have stayed until every carriage in the increasing line had been rifled and robbed.

II.

"Ah, Jack, old boy!"

The squire was waiting to receive his guests, on the steps of his Edinburgh mansion.

Mr. Justice Funnell bundled out of the cab and gripped his old friend by the hand.

Congratulations on your little sonrise! Couldn't have been more surprising. Your money or your life, eh, you old rascal?"

The squire looked at him in amazement, while he handed Lady Peggy out of the fly.

"Really, Joe," protested the squire, "I haven't got the ghost of a idea what you're driving at!"

"Ha, ha! It's no good your pretending you don't know!" rained the judge. "Your nephew, Dick, has given you away already."

"My nephew, Dick?" echoed the squire, turning with a look of inquiry to a robust young man standing in the porch.

"What?" Mr. Justice Funnell gasped. "Dick? That isn't Dick?" he asked.

"Why, of course it's Dick! What in the name of wonder are you driving at?"

But half a dozen other arrivals had already taken up the tale.

The squire looked blander than ever.

"But it was your nephew. I know it was. I recognized him at once!" protested Mr. Justice Funnell.

"My dear Joe, you're an ass. Here is Dick!" sniped the squire. "He has not been out of the house

had fired twice. There was a savage yelp in response, and then the flash of a sporting gun from the spinney. The mare reared upright on her haunches, and the fugitive slipped from the saddle as she rolled backwards.

For a moment he stood at bay. The blue steel still glinted in his hand. The judge saw this, and only spurred the harder.

The crashing of the bushes as he rode brought the fellow on guard with a leap. Up flew the pistol again. The judge's horse was rising to the last intervening clump of gorse, when a jet of flame stabbed out at its rider. Something struck Mr. Justice Funnell in the left shoulder. He rose in his stirrups, but immediately felt himself reeling. The highwayman made a side scramble to get clear of the flying hoofs; but the judge's cano whistled true like a sabre-blade, and the gold knob thudded home just above the fellow's ear. Down he went like a thistle-stalk, and out of the saddle came the judge like a sack of coals. He fell headlong into the frozen bracken, and there the squire found him, faint from loss of blood.

They carried him out, and set him on a mole-hill. Before him stood Dick Turpin the Second.

For Mr. Justice Funnell's special edification, the real Dick Careless flashed an electric torch on the handsome face, not unlike his own.

"Good-evening, my lad!" grinned the prisoner.

"You scoundrel! I knew I had set eyes on you before! I remember now!"

It was in their professional capacities—the one as judge of the Court of Criminal Appeal, the other as burglar—that they had met.

Robert Pritchard, alias Jack the Jockey, had had the enterprise to call in question the Recorder's latest sentence of five years' penal servitude passed upon him for burglary with violence. And, by the irony of fate, it was to Mr. Justice Funnell, of all men, that he mainly owed his escape! But for his rigid interpretation of the law, there was small doubt that Jack the Jockey would have been serving his sentence.

"Merry on me! What a mess!" groaned the judge.

"You're right! A mighty awkward one—particularly for your lordship!" admitted the highwayman. "Perhaps, though, under the First Offenders' Act—"

"Silence!" roared the judge.

A sudden twinge of pain from the bullet wound in his shoulder sent James dancing before his eyes. He rolled backwards off the molehill in a dead faint.

It was certainly very awkward for Mr. Justice Funnell. They let him down as lightly as possible in the witness-box, but it will be some years before he will be allowed to forget the night he aided and abetted Dick Turpin the Second in the highway robbery on Gilbert Hill. —London Answers.

The man who dislikes you nearly always likes those you dislike.

There is a tradition to the effect that once upon a time a woman in a crowded car got up and offered her seat to a man with a baby in his arms.

in the north of Ireland where there had been no petty sessions this year on account of the influence of the "catch my pal" movement. One of them is Armagh, and it is common knowledge that in the past the ecclesiastical capital of Ireland has not been notably free from drunkenness and crime.

ALL SECTS JOIN.

Another remarkable feature of the new crusade is the way in which it has brought all religious denominations together. The Roman Catholic priests are just as enthusiastic "catch my pallers" as their Protestant conferees and constantly appear on the same platform with them. The different Protestant denominations seem to have sunk all differences and instances are common now of Church of Ireland clergymen taking the services in Presbyterian Churches and vice versa. Hundreds of publicans have gone out of business and hundreds more are thinking of doing so, and the Irish pawnbrokers are also suffering from a diminution in the volume of their trade.

A NEW DREADNOUGHT.

Battleship Hercules Will Shortly be Launched at Jarrow.

The launch of the battleship Hercules will take place very quietly at Jarrow-on-Tyne, England, in a day or two. The Hercules is one of the three battleships provided for in the "regular" programme of 1909-10. Of these the Colossus was launched at Greenock on April 9, while the Orion is expected to be launched at Portsmouth in August.

The armored cruiser Lion, completing the original programme, will be set afloat at Devonport in September. The Hercules was laid down on July 30, 1909, and has thus been on the stocks a little over nine months. A total sum of £1,294,708 is to be spent on the ship by the end of the present financial year, and as she is to be completed four months after that, it is probable that her total cost will not exceed £1,650,000.

A detailed description of the Colossus was given in these columns when the ship was launched. The Hercules will be similar in all respects—that is to say, she will displace 22,500 tons, and will carry ten 19-inch guns, all mounted on the centre line, allowing a full broadside, after the American model.

FIRIED IN THE AIR.

Young Albanian in Squad Ordered to Shoot His Father.

According to a message from Constantinople published in the *Morgenpost* of Berlin, an Albanian of good family who had joined the insurgents was captured and ordered to be shot.

Among the firing party from Uskub was the son of the condemned man. He demanded to be released from the duty, but the Turkish commander forced him to remain with the squad. But when the order to fire was given, the son aimed high in the air, and his father fell, shot by the remainder of the firing party.

The commander thereupon ordered the arrest of the son, and he was marched off to the military prison, where he hanged himself. The officer in command was subsequently transferred to another garrison.

Revenue 20 Times as Great as When British Control Began.

When England assumed sole control in 1882 Egypt was still bankrupt, with a public debt of more than \$500,000,000 and an income insufficient to pay the interest and carry on the Government.

The public revenue in 1882 amounted to \$4,500,000; in 1907 to \$1,500,000, more than \$10,000,000 in excess of the expenditures. On January 1, 1908, the sum of \$45,000,000 was in the general reserve fund and the public debt was reduced in 1908 by \$1,600,000; it now is \$479,000,000.

The cities and towns were without any drainage or sewerage, says The World To-Day. Only within ten years even Cairo itself, with a death rate of forty-six per one thousand, has undertaken any such public work. In the country every canal was polluted and stagnant pools of filth were near every village.

The annual pilgrimages to Mecca were likewise the means of introducing many diseases. Cholera and other epidemics were of frequent occurrence, and their ravages carried off thousands and thousands of the population.

Little by little the various difficulties of the situation have been studied and solved by the administration, until now Egypt may be considered a reasonably healthy country. Of course vast sums of money have been required to effect such result.

At first enormous difficulty was encountered by the English in making changes in the system of taxation, because the people, so long accustomed to the betrayal of their interests, thought the plans proposed were simply for the purpose of increasing their burdens. Little by little, however, they learned that another era had opened, and finally their suspicions were calmed. They then began to work with renewed energy, and now, secure in the fruits of their labor, they are not merely improving their own conditions, but are building up the reputation of their country.

MIRACLE OF A SHIP.

Every Smallest Part Numbered, Every Rivet Hole Counted.

Before a Dreadnought is built, the whole plan is conceived in the brain of one man, even to every one of the million rivets.

Before every plate is carried to the slips, its size has been verified exactly, and every rivet hole has been pierced to fit the rivet hole that will fall opposite. The same rule applies to beams, bulkheads, engine house floors, and walls—everything, in fact—and every part, no matter how small or large, is numbered.

Even the armor-plates, though they are twelve inches thick, come to the yard shaped and there is nothing to do but bolt them on.

Two years are counted from the day when the first keel-plate is swung into place to the day when the ship is armed and ready for commission. The ship builder has to calculate in advance for every day of the time what labor and material he requires.

As time rolls on, the still small voice of conscience is apt to become stiffer and smaller.

A RESCUE VESSEL.

Germany Provides for Accidents to Submarines.

The French navy's lack of adequate means to rescue the submerged *Pluviose*, which was run down the other day in the English Channel by the Calais-Dover mail steamer, calls attention to the fact that Germany alone of all nations possesses a vessel capable of dealing with such accidents. Although Germany has only eight completed underwater boats, compared with Great Britain's 63, France's 56, Russia's 30 and 18 of the United States, Teutonic thoroughness has already provided a rescue ship.

She is named the *Vulkan* and was launched at Kiel in 1907. The vessel, which has a length of 230 feet, consists of two separate hulls. These are fitted with engines, which give a speed of twelve knots.

At either end the separate hulls are connected by a deck, so that viewed from forward or aft the ship presents the structure of a tunnel.

A large space sufficient to allow the largest German submarine yet designed to pass through, is left clear between the two hulls, and over this are erected two steel girder bridges, with two others connecting them.

These bridges are fitted with a powerful electric crane, capable of lifting a weight of 500 tons, and when a submarine has thus been raised it can be rested upon movable girders which can be placed beneath it.

The ship itself is more or less a floating workshop. With the exception of those directly concerned in the navigation of the ship all those on board are skilled engineers and a number of divers are carried, so that operations can be commenced as soon as the vessel arrives on the scene of an accident.

CROWN JEWELS PROTECTED.

Improvements in the Strong Room in Tower of London.

The alterations in the strong room in the Wakefield tower of the Tower of London are nearly complete, and when the jewel room is reopened, visitors will find a great change in the structure and internal fitting. A fresh stone flooring has been laid and a new steel grid has been built to enclose the plate glass showcase containing the regalia.

The bars of this grid are of tempered steel, placed closer together than the bars of the old case. A hidden electric alarm of the latest type has been connected with the new grid, so that if a bar be wrenches even slightly a gong sounds its warning through the tower.

Every lock throughout the room has been improved and made more complicated, so that various keys have to be used in the opening. The iron lined doors have been strengthened and additional electric lights have been installed.

A scheme for constructing a trap in the stone flooring of the jewel room, through which the regalia and precious stones could if necessary be lowered into the dungeon beneath the Wakefield tower, was found to be impracticable owing to the condition of the underground cell itself. This dungeon is beneath the level of the river and is very

TREASURE IN WRECKS

PLAN TO REGAIN \$20,000,000 FROM THE OCEAN.

Captain Gardiner Gives Account of Fortunes to be Won from Neptune.

Previous to the opening of the Suez Canal in 1870 all British transports and East Indiamen made the voyage to and from the East by way of the Cape of Good Hope. Many were wrecked. Most of these wrecks lie close to the shore, and all attempts to save their contents were, until quite recently, attended by great and in most cases insuperable difficulties, owing to the inefficiency of diving and salvaging apparatus and the practical impossibility of removing the sand with which most vessels submerged for some years are covered.

BETTER DIVING APPARATUS.

During the last few years, however, great strides have been made in perfecting diving apparatus, and it is now practicable to work at a much greater depth than was heretofore possible. At the same time the introduction of the powerful centrifugal pumps now available renders it possible to remove large quantities of sand in a very short time.

An experienced mariner, Captain Gardiner, is to superintend the operations on the wrecks. Evidently they are plentiful down south, for it is stated that after an exhaustive search in the archives of Cape Colony the captain selected no fewer than 137 of the more valuable and accessible wrecks and succeeded during the course of seven years, at an expenditure of \$20,000, in locating thirty-two of them. Of these he has actually surveyed sixteen and recovered surface property from four of them.

The government of the Cape of Good Hope has granted licenses to work these vessels, subject to a royalty of 15 per cent. of the value of property recovered.

In his report Captain Gardiner says:

WRECKS WORTH MILLIONS.

"Although I have been able to ascertain the whereabouts and values of thirty-two wrecks, exhibiting assets representing a sum exceeding \$20,000,000, I should mention that I am in a position to locate other wrecks, many of which offer to the recoverer prizes whose worth should figure at hundred of thousands of pounds sterling."

"I will not enter upon a detailed statement concerning the thirty-two wrecks to which I refer, but will confine myself to making mention of four."

"No. 1 Wreck—It is recorded and corroborated in a report from the captain of this ship to directors of the East India Company that her cargo embraced, among other things, 720 bars of gold, 1,400 bars of silver, nine boxes of precious stones and specie, the reputed aggregate value of which is calculated to exceed \$5,000,000. The assets should be recovered with great facility and with less difficulty than from most of the other submerged

THE G. T. R. SYSTEM.

Its Rail and Water Lines Together Will Total 15,889 Miles.

Many people fail to appreciate the commanding position that the Grand Trunk Railway System, with headquarters in Montreal, occupies among the great Railway Systems of the North American Continent. It is the Pioneer railway of Canada, and one of the earliest built and operated on this side of the Atlantic.

From a financial standpoint, the Grand Trunk Railway System is the largest organization in Canada, and one of the greatest in the British Empire, the total capitalization of the Grand Trunk and its subsidiary lines being \$435,069,355. Including the Grand Trunk Pacific Railway, the total capital at December 31st, 1909, was the enormous sum of \$534,180,795 for the entire Grand Trunk and Grand Trunk Pacific System of Railways.

The present total mileage of the Grand Trunk, including its subsidiary lines, is 5,400 miles, with a double track mileage of 1,035, which makes it not only the longest double track railway in Canada, but one of the longest continuous double track railways under one management in the world.

Including the mileage of the Grand Trunk Pacific Main Line now under construction and contemplated—3,640 miles, of which 3,044 miles are under contract, also 5,818 miles of branch lines—the total length of the entire System of Railways will eventually amount to 14,650 miles.

In addition to the rail mileage the Grand Trunk operates steamer lines on the Great Lakes, between Midland, Depot Harbor and Fort William, Milwaukee and Chicago. It also owns and operates large car ferry steamers on Lake Ontario between Cobourg and Charlotte (60 miles) and on Lake Michigan between Milwaukee and Grand Haven (distance 80 miles), the total mileage of lake lines being 1,239 miles. Adding the lake line mileage to the rail mileage above, gives a grand total of 15,889 miles of rail and water lines.

With regard to the amount of business handled, the Grand Trunk also stands in the forefront. During the year 1909, on the entire Grand Trunk System, the number of tons of freight handled amounted to 19,233,485 tons, while the number of passengers handled was 13,916,147. According to the official reports for 1909, the Grand Trunk takes rank among the ten largest Systems on the North American Continent, based on the business handled (freight, tonnage and passengers), while on its lines in Canada only, it handled 1,431,54 to 5 of freight and 1,167,000 passengers more than the railway ranking next as a common carrier; also, according to the Government reports, it handled 25 per cent. of the total freight hauled, and 33 per cent. of all the passengers carried by all the railways in Canada.

MILK-BOTTLING MACHINE.
Has a Capacity of 7,680 Bottles an Hour.

The filling of milk bottles by ordinary methods is such a tedious task for large metropolitan milk companies that a machine to do the

"FIRST BOY IN ENGLAND"

PRINCE EDWARD OF WALES A PUBLIC FAVORITE.

Heir to British Throne a Typical English Lad—Popular Among Schoolmates.

Prince Edward of Wales, who has been "the first boy in England" for sixteen years, has gone to join his ship at Dartmouth and take his place as Cadet Edward of Wales. At the funeral ceremonies of his grandfather King Edward he was a prominent figure, not only because he is heir to the throne, but because he is highly popular.

A typical Anglo-Saxon lad is Prince Edward, now called the Duke of Cornwall and soon to be formally made the Prince of Wales. He is fair haired, blue eyed and sturdy of limb; the picture of health, strength and good temper.

From babyhood he has been popular. His doings and sayings have been chronicled, and half the mothers of England put their sons into white sailor suits like those chosen by the Princess of Wales for her son. Yet admiration does not seem to have spoiled him at all. He is still a frank, simple English boy with a bright smile a pleasant manner and

AN INFECTIOUS LAUGH.

Not only is Prince Eddie a public favorite, but he is a hero in his own family. His three small brothers and one sister look forward to his holidays as festive occasions. His father and mother, King George and Queen Mary, although they are quite strict with their children as a rule, often relax discipline for their oldest son and are as proud of him as any middle class parents of their first born.

Even at school Prince Edward is popular, a boy must be more than a prince to be a favorite at an English school. You must be an all round expert at games and sports, a generous, open handed good fellow, with plenty of courage and a love of fair play.

Prince Edward has always been a sportsman. He could ride his pony when he was 5 and on his seventh birthday King Edward gave him a bicycle. Swimming lessons at the Bath Club come next, and a little later cricket, football and boxing, and now he is one of the first class cross country runners of England.

Before he was 10 he had handed over his ordinary nursery toys to his younger brothers and was giving all the time he could spare from lessons and exercise to a fleet of

MODEL BATTLESHIPS.

which had been given him by his father. It was the time of the Russo-Japanese war, and the young Prince with model guns, forts and maps of the scene of the campaign was following each move and fighting mimic battles with his fleet. Later King George, anxious to encourage his son's love of the sea, gave him a large model brig. This is kept at Virginia Water in charge of an old sailor, and Prince Edward has learned the management of it.

Of course when the time came for him to go to school it was not dif-

and precious stones could if necessary be lowered into the dungeon beneath the Wakefield tower, was found to be impracticable owing to the condition of the underground cell itself. This dungeon is beneath the level of the river and is very damp. Nothing has been housed in it since the Middle Ages, when prisoners languished in the tower.

MUSIC AND CRIME.

French Socialist Advocates Instruction in the Arts.

Marcel Sembat, a French Socialist Deputy, is developing the thesis that society ought to make use of music, which, the poet says, has charms to soothe the savage breast, for the prevention of crime through its influence upon human character in process of formation.

"I firmly believe," he declares, "that instruction in art, and in music particularly, would turn many young persons, especially those of the laboring class, from the evil way that leads to the wine-slop and too often to prison."

The alternative of virtue or vice is presented at a certain age before each of us. Temptation to crime is chiefly the desire to possess the means of pleasing the opposite sex. The cultivation of music or other arts will produce legitimate opportunities for the healthful association of young men and young women and will afford the needed relief from daily toil, while giving to it a zest which is now lacking, and will tend to arrest the rapid growth of that class which is the fruit of a diseased and unnaturally restricted civilization — the Apaches."

LUXURY IN AERIAL TRAVEL.

Salon of New Passenger Airship a Marvel of Comfort.

The German Aerial Navigation Company is trying to ensure the comfort of the passengers who will travel in its airships. The passengers' cabin for the L. Z. VII., the first Zeppelin liner, has just been fitted to the balloon now nearing completion at Friedrichshafen.

The cabin, which was made at Stuttgart, is paneled in mahogany inlaid with rosewood and mother-of-pearl. The entire cabin, which is thirty feet in length and from six feet to eight feet in width, is divided into five smaller cabins, each of these affording seating accommodation for four people. The seats are wicker armchairs screwed to the floor, but made to revolve. There are a small anteroom and a lavatory.

The windows are planned very spaciously to allow a good view, and are fitted with glass in the fore-part of the cabin. The walls are of thin mahogany, while doors, covered with sail-cloth, lead forward and aft and to the gondola of the vessel.

LATE KING'S LUCKY NUMBER

King Edward's lucky number was nine. Both his parents were born in 1819, he was born on the 9th, his marriage took place in the year '83, which numbers added the one to the other make nine; his reign commenced in 1901, he was to have been crowned on the 27th, which figures added together make nine, and he was actually crowned on the 9th of August.

of silver, nine boxes of precious stones and specie, the reputed aggregate value of which is calculated to exceed \$5,000,000. The assets should be recovered with great facility and with less difficulty than from most of the other submerged vessels.

"She lies in from three and a half to four and a half fathoms of water. The hull is intact and thus her contents are easily available. Modern centrifugal pumps would extract the whole of the sand contained within her in from one to two months. The total cost of salvage should not exceed \$35,000.

No. 2 Wreck—This vessel is in a good salvaging position. Her contents, according to evidence of a thoroughly reliable nature, were valued at \$1,000,000. I estimate that the greater part of the specie could be recovered in six months at a maximum cost of \$35,000.

MIGHT WIN \$3,500,000.

No. 3 Wreck—The worth of the contents of this vessel represents a value of more than \$3,500,000 in specie. She lies in twelve fathoms of water, on an ocean bed covered by kelp. I am certain that with a few expert divers and good up-to-date plant, the greater portion could be recovered at a cost of \$60,000 in a period of six months, as there is no sand to extract from the ship.

No. 4 Wreck—This vessel is in a similar position to the one stated above. She is in five fathoms of water and is filled with sand. From the investigation of authorized records I have ascertained she was carrying \$4,000,000 in specie when lost; her bell and two other articles, easily accessible, were recovered. She would have to be worked in a similar way to No. 1. I estimate that in ordinary weather the expense of recovery would be under \$30,000. The time occupied in this operation should not be over six months.

The above four wrecks I have located and surveyed, as I have twelve others. Besides these sixteen wrecks, the contents of which I have ascertained, sixteen further wrecks remain, all of which I have located, but not yet surveyed."

Thus, only a matter of \$399,000, which the company desires to commence business with, is needed to collect untold treasure from the depths of Father Neptune's realm.

QUEEN'S PERQUISITE.

The Welsh captain who caught a sturgeon in Pwllheli harbor and offered it to King George was doing no more than his duty, says the London Daily News. His Majesty is entitled to every sturgeon landed in the United Kingdom, and one of them, caught in the Thames, graced the festive board at Queen Victoria's wedding banquet. The King also has the right by statute to the head of every whale caught on the coasts of his kingdom. The tail of the whale is Queen Mary's perquisite, the object of this curious division being that her Majesty shall always be well supplied with whalebone, although singularly enough the whalebone is the King's half. Among other things which the King is entitled to receive are a pair of white doves, a pound of cumin seed, a pair of scarlet hose and a silver needle from his tailor.

The Commissary, however, was suspicious. Investigation revealed the fact that the play was a myth; the theatre was being used as a gambling house, where not only "banker" but roulette and baccarat were played by gamblers masquerading as actors. The usual raid was made, the cards and money seized, and the gamblers taken to the Police Court.

Has a Capacity of 7,680 Bottles an Hour.

The filling of milk-bottles by ordinary methods is such a tedious task for large metropolitan milk companies that a machine to do the work has become an absolute necessity. The latest form of milk-bottling machine is operated by two men, one to operate the machine itself, the other to see that it is properly fed with bottles; it has a capacity of 7,680 bottles an hour. Each operation, which takes about fifteen seconds, fills with milk twelve quart bottles in one carrier and twenty pint bottles in another.

With almost human intelligence the machine picks up a carrier of empty bottles, straightens it, if it happens to be out of line, moves it under and lifts it against a battery of spouts from which the milk issues, lowers and carries it to an apparatus which automatically caps each bottle and then discharges the carrier upon a car. This car carries the filled bottles either to a cold-storage room or a platform from which wagons are loaded.

The machine is claimed to be absolutely sanitary, even the caps for the bottles being sterilized after they are placed within it. The rate of operation may be regulated to the fraction of a second by a speed adjuster, operated by a hand-wheel. This is necessary because it takes more time to fill a quart bottle than a pint. Half-pint bottles, which have a neck the same size as the pint bottle, are also used, the machine being adapted for cream as well as milk, also for buttermilk. Cream and buttermilk flow much slower than milk—another reason for the speed-adjuster.

GAMBLER'S RUSE.

How the Paris Police Were Outwitted for a Time.

In spite of the continual war which the French authorities are waging against illegal gambling houses, clever brains continue to invent ruses to avoid detection. Usually the establishments are concealed under the guise of stamp-collecting societies, pigeon clubs, or charitable institutions, but even more ingenuity and cunning have been exercised in a case that has just come to light.

At a little Montmartre theatre, recently closed, it was announced that a play called "Banco" was in rehearsal. In one act the characters are shown playing "banker." With some astonishment the Police Commissary of the district observed that this was the only act in rehearsal. He asked for an explanation; he was informed that the rest of the play could not be rehearsed, because the parts were not entirely committed to memory, the scenery was lacking, and there were other difficulties.

The Commissary, however, was suspicious. Investigation revealed the fact that the play was a myth; the theatre was being used as a gambling house, where not only "banker" but roulette and baccarat were played by gamblers masquerading as actors. The usual raid was made, the cards and money seized, and the gamblers taken to the Police Court.

"He has the bad habit of borrowing." "And the worse habit of never paying back."

gave him a large model brig. This is kept at Virginia Water in charge of an old sailor, and Prince Edward has learned the management of it.

Of course when the time came for him to go to school it was not difficult to make a choice. He wished to be a naval cadet, so to Osborne he went and when his training there was completed he was removed to the training ship Britannia at Dartmouth, where he is not working.

His life is the same as that of any other cadet. He is up at 6:30 a.m., does his three-quarters of an hour's work before breakfast, attends the college laboratories, the forge and the factories and learns to handle the tools of the workshop. He even had to serve his apprenticeship as a fag.

A story is told of his early days at Osborne which seems to prove that the Prince is not without commercial instincts. He had written home to his mother for extra pocket money, which she refused to send, and so he wrote a long letter to his grandmother begging her to help him out. Queen Alexandra wrote a long letter reprimanding him for extravagance.

GREAT LETTER WRITER.

To her surprise Prince Edward, who hates letter writing like a normal boy, immediately answered her letter and asked many questions. She answered them, only to receive another letter from her grandson. At last the truth came out that the Prince was selling the Queen's autograph letters to his schoolmates for money to spend at the tuck-shop.

In his lessons Prince Edward does not shine. If he were an ordinary lad he would be called backward, except in the few branches of study which he likes.

Love of animals is a trait of all the Wales children, as they were known till very recently. Prince Edward's pets include dogs, cats, ponies, horses, birds, a monkey, guinea pigs, rabbits, white mice and several kinds of birds.

The lesson of charity has been inculcated in Prince Edward, as in his brothers and sister. They have always had to send parcels of toys to sick children at Christmas time and they have had to give not only toys but things they fancied themselves.

King Edward and his grandson were chums and were often seen together at Windsor.

HAZARDS OF MINER'S LIFE.

They are Much Greater in America Than in England.

Mr. Chiozza Money, the English statistician, has shown what a terrible cost in human life the production of coal in England represents, where in round numbers 1,000 lives are sacrificed yearly, and the injuries are countless. Pursuing the subject further, Mr. Money states that the record in the United States is far worse, although in that country coal mining is attended with fewer difficulties than in England. In Great Britain, for every 10,000 men working in the coal mines, thirteen are killed annually, while in the United States, there are thirty-four fatalities in ten thousand workers. And whereas in England the death rate has gradually been reduced in America it is on the increase.

NOTES AND COMMENTS

"Votes for women!" would appear now to be within reasonable distance of accomplishment. Under the name of the conciliation committee for women suffrage in England an influential group, consisting of thirty-six members of parliament of all parties, has been organized with the Earl of Lytton as chairman. The committee is able, moreover, to rely on the support of several members of the cabinet as well as of the front opposition bench, and it is declared that a basis of compromise which meets the views of all parties has been arranged.

It seems that the basis for granting women the parliamentary vote would be very much the same as they now enjoy in municipal elections. Eighty-two per cent. of the women who would be enfranchised would come from the working classes and would be either "householder" or \$50 occupiers. Married women, under the scheme would not be disqualified, though comparatively few would, in fact, be qualified, inasmuch as husband and wife owning or occupying the same premises, could not both have a vote. The effect would be, however, to enfranchise about 1,000,000 new electors. A bill on this basis, which is both brief and simple, will be introduced shortly after the reassembly of the British House of Commons and the committee has no doubt of its passing by a large majority if the necessary facilities as to time be afforded.

"This question is as urgent as it is important," says the committee's manifesto. "It is forty years since the first suffrage bill passed its second reading in the house of commons and the patience and ability of the older societies deserves an earlier reward. The painful struggle of the last four years is an experience which no one would wish to see repeated. It is with the object of preventing a continuance of this evil and of forwarding an act of justice long due that we ask for support of this bill. The reform will be the more gracious if it comes by the united effort of all parties."

The change that has come over the modern English girl is remarkable. Her steadily growing "manliness" is coming in for more criticism than ever. Her education and early training by male instructors is severely condemned by those who profess to be deeply concerned by the change for the worse that is coming over her. It is noted that she is becoming less refined; that she is fast losing all her charm of femininity; that she is becoming too masculine, not only in her manner, but in her gait and motion in her

A REVELATION OF TRUTH

The Pure in Heart See God Because in Them the Eye of the Spirit is Undimmed

"Blessed are the pure in heart for they shall see God."—Matt. v. 8.

In an important sense every man is the maker of his own god, worshipping that which is the reflection of his own knowledge and the ideal personification of his desires. This accounts for man's persistent imagining of a deity in his own form, since he knows nothing higher; it also accounts for our attributing to that deity the peculiarities of temper and taste which are our own.

We have a confidence that in some way all life is united in one great life, that all our love and hope spring from one great heart which loves and hopes, and so we give to this great, all embracing life the color and form of our own. Doubtless our consciousness of that divine and universal life is a revelation of truth, just as our consciousness of ourselves is the highest proof of our being.

The danger comes when we proceed to make our consciousness of God or our personal conception of the standard and form for all others. We say this is my lord; this must also be yours; you have no right to believe any other than I believe or to cherish any other pictures of the divine. Such a demand is simply equivalent to a claim that you have exclusive supernatural powers for the discovery of truth.

But the danger of emphasis on our personal ideas as to the deity goes farther than this; it makes essential that which is only incidental, and central that which is

BOUND TO BE DECISIVE.

For the great thing is not to be able to describe a god, but to be conscious of and live by the divinity of all life; not to be able to set up a deity outside ourselves, but to realize God in ourselves.

The great question of religion is not that of the form or appearance of any divine being, but the realization of the fact of an eternal and sublime divine life that runs through all life, in which we have a part, of which we are a part, and of which all that is fair and good and lovely in our world is the revelation.

We have talked with pitying superiority of the deluded peoples who worship forms and representations of their gods; how much wiser or better are we if we worship descriptions and definitions of our god? There is no essential difference between the worship of a verbal delineation and the adoration of a wooden or a stone delineation.

The child of nature who saw God in all things, who believed that he whispered in the breezes, moved through the trees, shouted in the storm, who believed that his divine one was working through all and was made known through all, was a good deal nearer the truth than we who think of one who only wrought long ago, who sits apart from our present world, or who is revealed only through a series of logical propositions.

The godly man is he who finds the divine in all, to whom the whole universe speaks in terms of personality, and who interprets all his life in terms of the ideals which are essentially personal, those of goodness, truth, love, and self-giving. All that awakens goodness in him, all that kindles aspiration, is the power of the most high working in him, all that appeals to the best is the voice of

HIS GOD CALLING HIM.

We need not look far to find the eternal goodness; it breathes in a child's affection, a mother's devotion, a patriot's service; it challenges us in deeds of heroism and sacrifice; it comes in the quietness of the eventide and thrills in the melodies of nature; it is found on the pages of life rather than in the logics; it is within us and all about us rather than in books and printed pages.

The pure in heart are the poets of the world who see its goodness and its glory, to whom it means more than things to be bought and sold; it means messages of love, prophecies of larger life, joys that lie too deep for words, and foretokens of a life to which this is but the gray before the dawn.

The pure in heart are they who, through all life's toil, through all the cares of business and engrossing duties, keep undimmed youth's vision of things better and more enduring than daily bread and molting raiment, who keep single the aim of life itself as the thing for which we are living and to not confound the tools and agencies of living with the life itself.

With our heads we may discover a deity who is but a larger man, with our hearts, simply, purely seeking the best, through the love of the spirit we come to know a world that is divine, glorious even through its shame and struggle, speaking of love in a myriad voices, winning us to living above the dust, assuring us that we are essentially of this same divine life.

INTERNATIONAL LESSON,
JUNE 26.

Lesson XIII. Lesson of the Tares.

HOME.

WITH APPLES.

Nothing in all our varied and fascinating range of fruits holds the quality of the apple. A ripe, raw apple at its best is digested in eighty-five minutes, and the malic acid, which gives it its distinctive character, stimulates the liver, assists digestion and neutralizes much noxious matter, which, if not eliminated, produces skin eruptions. The more fruit we add to our dietary the clearer the brain and skin we are likely to have. "An apple a day keeps the doctor away." So runs the old adage, and certainly a plentiful use of them will save many a dose of nauseous medicine. An apple eaten before breakfast has a beneficial effect upon the complexion, and for those subject to biliousness it is worth a trial. Apples are like bread. We may want a change of kind, but bread itself we never tire of. And we are always on the outlook for something to add to the list of our apple recipes. In a roasted state apples are wholesome and strengthening to a weak stomach. In malignant fevers, when used with the juice of lemons and currants, they are considered efficacious.

Apple Omelet.—Peel, core and slice a pound of apples. Stew them with just enough water to keep them from burning. When soft beat to a smooth pulp with a fork. Add to it two tablespoonsfuls of sugar, a dust of powdered cinnamon and two teaspoonsfuls of lemon juice. Cool a little, then stir in the well-beaten yolks of three eggs. Beat well. Fold in the stiffly beaten whites of the eggs. Take an omelet pan, butter it thickly. Make very hot over the fire. Pour in the mixture. Cook over the fire for three minutes; then put the pan into a fairly quick oven till it feels firm and spongy when pressed, and is a delicate brown. It may take five or eight minutes. Fold over and serve at once on a hot platter.

Apple Dumpling.—This is made with suet pastry, and the apples are cored, peeled and cut across in thin slices. Sift two cupfuls of flour into a basin, rub a quarter of a pound of finely chopped suet into it, then add one teaspoonful of baking powder, one teaspoonful of sugar and half a teaspoonful of salt. Add enough cold water gradually to make a stiff paste. Roll out the pastry, and line a buttered pudding mold with it; put in half of the fruit, then sugar to sweeten and the rest of the apples. Cover with a round of the pastry, wet the edges and press well together. Cover with a buttered paper and steam steadily for three hours. Turn out and serve with hot milk.

Apple Snow.—Six large apples, the whites of six eggs, four tablespoonsfuls of sugar, one lemon, a few strips of angelica or a few preserved cherries. Peel and core the apples, then stew them until tender with a little water. Next rub them through a sieve. When the pulp is cold add to it the strained

coming over her. It is noted that she is becoming less refined; that she is fast losing all her charm of femininity; that she is becoming too masculine, not only in her manner, but in her gait and motion in her outdoor pastimes.

Not so far back as a generation ago, the idea of the English girl was something like the following: "Neck of lily, cheeks of roses and eyes of heaven; hair of sunny auburn, whose tiny tendrils dance with the slightest motion; a face nearer round than oval, but irradiated by the unsetting sun of a kind nature; a figure meek and graceful, wreathed in innocent muslin, and perpetually undulating and bending into lines of beauty."

"A girl of that type," writes a grieving matron, "is seldom to be met with now-a-days. She is a rara avis only to be seen in country districts and out of the way places, far removed from the hundred and one blighting influences and attractions of town and city life. These certainly tend in the direction of the unmaking of the typical old English girl. Our schools to-day are in a large measure responsible for the tomboy, who is multiplying on every hand at an astonishing rate. You come across them by the dozen. Manliness is their chief characteristic. They seem to try and imitate men as far as possible."

Their dress is similar to that of the male sex; they smoke, they cycle, drive automobiles, play golf, hockey and other vigorous games. Indulgence in these pastimes is even leading them to walk like men. They are breaking into a stride which in my young days would have been regarded as almost criminal; at least as a sign of bad breeding. If a girl is to be encouraged to keep her girlishness, the refinement and the gentleness which are her birthright, by all means let her be taught by a woman."

A WISE STEED.

Trooper Brown of the British Territorials was "green." His horse, likewise unaccustomed to war, seemed from its appearance and general structure to have been not very long ago a dray horse. But it was a wise animal, and had learned through experience that to keep one's mouth shut is to avoid many troubles. Much practise had enabled it to keep its mouth shut very successfully—and very tight.

On the first morning parade in Trooper Brown's first camp, the lieutenant rode down the lines of his company.

"All the men turned out, sergeant-major?" he queried.

"Yessir," said the sergeant-major, "all except Trooper Brown. He's waiting for his horse to yawn, so he can slip the bit in; but the worst of it is, sir, the brute doesn't seem a bit tired."

INTERNATIONAL LESSON, JUNE 26.

Lesson XIII. Lesson of the Tares, Matt. 13. 24-30, 36-43. Golden Text, Matt. 13. 43.

Verse 24. A man that sowed—The outstanding feature of the parable throughout is the personality of this sower. He is the antagonist of Satan, the householder, the master of the reapers, the Son of man, the Lord of the world, the absolute arbiter of the destiny of all men.

Good seed in his field—The quality of the sower's seed is the same as in the former parable, but here the soil is presumably all good.

25. While men slept—Not all the details of a parable yield to interpretation. Only a discriminating judgment is able to decide which are significant and which are not, and it is easy for the imagination to create supposed references which do not actually exist.

In the sower, Jesus explains about everything; but in the tares, several things, such as the enemy's going away, the servants of the householder, the binding of the bundles, are left uninterpreted. So, this sleeping of the men is not said to have a special meaning. Certainly it is not condemned; sleep is natural after hard toil (compare the slumbering of the ten virgins). It suggests, at any rate the subtle and unseen ways in which Satan makes the most of every opportunity presented by human nature.

His enemy came—This is the consistent New Testament teaching, from the fourth chapter of Matthew to the twentieth of Revelation. Never is there any tendency to minimize the force of evil, as directed by a cunning personal power. The scattering of the tares is not the work of an unfavoring wind but is the carefully executed act of a malicious agent.

Tares—More accurately the bearded darnel, a weed which in its early stages so closely resembles wheat, in the midst of which it commonly grows, that it is well-nigh impossible to distinguish them. Often it breeds a poisonous fungus which produces dizziness, convulsions, and sometimes death.

Went away—After the seeds of poison have been sown in the heart they will develop with little encouragement.

26. When the blade sprang up—Referring to the entire grassy crop of the field, including tares and wheat.

Brought forth fruit—Referring to the period of the heading of the kernel. It was then, and not till then, on account of the resemblance to the wheat, that the tares appeared in their true character.

28. An enemy hath done this—This kind of revenge, so far as can be learned, has never been known in Palestine. It stands as an unexampled outrage.

Wilt thou . . . that we . . . gather them up—Jesus offers no interpretation of this zeal of the servants. But there are always those who are ready like the apostles who would call down fire from heaven, to bring forth drastic measures to suppress real or imagined wrongs.

29. Nay—Weeding out wheat must take place either before the period of the formation of the kernel or

growth of the field has reached that stage in which the tares can be distinguished. The danger is that the wheat, whose roots are intertwined with those of the tares, should be disturbed while it is in the formative state. From the point of view of the practical farmer, therefore, the question of the servants was one of folly. The lives of good and bad are so often closely bound up together that the violent removal of one is sure to cause harm to the other.

30. Let both grow together—The hastiness of human judgments is condemned by the patience of the divine. Whether the bad may become good is not hinted at. But, that the rooting up of any is prohibited, is a merciful provision indicating that God is willing to wait till every man's chance is exhausted.

I will say to the reapers—In the explanation (verse 39) we discover for the first time that these are different from the servants.

The tares would be separated from the wheat either by weeding, or by "carefully picking out the stalks of darnel one by one from the cut grain."

33. The field—There has been continued controversy here over the question of church discipline. But it is ruled out entirely by the fact that the field cannot be interpreted narrowly as the church, but is the world.

The sons of the kingdom—Those who treasure up in their hearts manifest in their life the word of truth. Of course these are a part of the world of men, which Jesus claims rightfully his kingdom (41). In the parable the word "kingdom" is used somewhat loosely, and must not be too narrowly interpreted. In verse 24 it is that sum of divine truth embodied in life which Jesus endeavors by the parables to define. In verse 43, it is the perfected and finally established kingdom of glory.

40. Burned with fire—A figurative description of the awful doom of the wicked.

41. All things that cause stumbling—This is to be understood in a personal sense.

TO TRY ON YOUR FRIENDS.

A dry eye denotes a hard heart. A pouting lip means timidity. An open mouth, an empty head. Coarse hair, a coarse mind. Full cheeks show a good digestion.

A pointed nose means a meddlesome disposition.

Thick, curly hair means great physical strength.

A dimpled chin is pretty, but suggests feeble intellect.

A broad face is a proof of self-assurance and obstinacy.

Full temples mean mathematical gifts.

Thick eyelids, covering half the pupils, denote great artistic powers.

Bumps on the forehead mean great intelligence.

Delicate features, a refined mind. Compressed lips prove secretiveness and acquisitiveness.

When a detective sees an airship sailing away he is justified in thinking that there is something up.

And all the world loves to laugh with a laugher.

few strips of angelica or a few preserved cherries. Peel and core the apples, then stew them until tender with a little water. Next rub them through a sieve. When the pulp is cold add to it the strained lemon juice and the sugar. Beat up the whites very stiffly, then add them lightly to the apple pulp, a tablespoonful at a time, beating continuously. Serve the snow at once in custard glasses, sticking a few strips of angelica or cherry in the top of each glass to give it a pretty touch of color.

Apple Souffle.—Two pounds of good cooking apples, four eggs, six heaping tablespoonfuls sugar, one lemon, half a cupful of cream, one heaping tablespoonful powdered gelatine, two tablespoonfuls boiling water, red coloring, two cloves, one inch of cinnamon and half a cupful of cold water. Peel, core and slice the apples. Put them into a saucepan with the cold water, grated rind of the lemon, cloves and cinnamon. Stew these gently until the apples are soft. Then remove the cloves and cinnamon, and rub the fruit through a hair or fine wire sieve. Separate the yolks from the whites of the eggs. Put the former in a basin with the sugar and stand the basin over a saucepan of boiling water. Beat the eggs and sugar till they are thick andropy. Do not let the water boil after the first few minutes. When this egg mixture is quite thick, lift it off the saucepan and continue to beat till the mixture feels quite cold. Dissolve the gelatine in the boiling water, and strain it into the apple puree. Mix these with the sugar and yolks. Stir in very lightly the stiffly beaten whites and lastly the whipped cream. Color it if desired, very delicately with red coloring. Have ready a china or plate souffle mold with a band of paper tied round it on the outside, so that it stands up above the edge of the mold about two inches in height. Pour in the mixture directly it is mixed, or it will begin to set in the basin. Leave it till cold, then untie and draw off the paper band. Decorate the tip with a design in whipped cream, or it may be sprinkled with chopped pistachio nuts and coconut. Serve in the mold.

Apple Hedgehog.—Six large baking apples, three tablespoonfuls brown sugar, two ounces of sweet almonds, red currant jelly, the rind of half a lemon, two cloves. Peel, core and slice the apples, stew them until they are soft with the sugar, lemon rind, cloves and a very little water. Then take out the rind and cloves, and rub the apples through a sieve. Blanch the almonds and cut them lengthways into thick shreds. Arrange the apple pulp in a pretty dish to look as much the shape of a hedgehog as possible. Stamp out three round pieces of red currant jelly about the size of a fifty-cent piece, arrange these down the middle, be rendered almost uninflammable, or at least will with difficulty take them stick the shreds of almonds all over the apples. A dish much patronized by our grandmothers.

Apple and Fig Jam.—Wipe the apples or wash them if necessary, take off the stalks, and cut them in two, but do not pare or core them, and put them into an enameled saucepan with sufficient cold water to cover them. Cook slowly until

they are soft and pulpy, then pour into a jelly bag and allow to strain. Wash some figs well and cut each into four or six pieces; put these into a saucepan with two cups of cold water and simmer slowly until they are quite soft. Allow one pound of figs to every four pints of the apple juice. When the figs are cold put them into a saucepan with the apple juice and sugar, in the proportion of one pound to a pint of juice. Boil the jam until it jellies, then divide it into jars. If preferred, a little whole ginger may be added for flavoring.

THE LAUNDRY.

Kitchen Soap.—Ten pounds grease (saved drippings) melted not too hot and poured into an old tin clothes boiler. Two cans lye dissolved in two quarts of hot water, slowly stirred into the hot grease. Stir constantly one and one-half hours, towards the last adding two tablespoonfuls borax. Empty into paper lined box and within four hours' time, before it gets too silod, cut into twenty-five pound bars.

Care of Flatirons.—When flatirons are not in use keep each one tied up in a tight fitting woolen bag or old stocking top. This prevents them from becoming rusty or rough. Rub them occasionally on a piece of cedar when ironing to keep the starch from sticking. The odor is agreeable and it will not discolor the most delicate fabric.

Incombustible Dresses.—By putting an ounce of alum or sal ammoniac in the last water in which muslins or cottons are rinsed, or a similar quantity in the starch in which they are stiffened, they will not burn without flame. It is astonishing that this simple precaution is so rarely adopted.

PINEAPPLE.

Pineapple Pudding.—One teacupful tapioca, four teaspoonfuls of water, one teacupful of sugar, one small juicy pineapple. Soak the tapioca over night in one and one-half teacupfuls of water, add two and one-half teacupfuls more of water, and cook in a double boiler until transparent. Add the sugar and finely minced pineapple. Put into a wet mold and chill. Serve with plain or whipped cream. Delicious.

Pineapple in Jelly Nests.—Pare and shred a fine ripe pineapple; add sugar to make it quite sweet and let it stand for several hours. Then drain off one cupful of the juice and boil it to a rich syrup with three-fourths cupful of sugar. Add slowly the well beaten yolks of four eggs and cook in a double boiler until the mixture thickens. Then take from the fire and beat until cold. Make a plain strawberry jelly after the recipe in the gelatine package, pour it into a border mold, and let stand in a cold place until perfectly firm and time to serve. Then turn it out carefully on a shallow glass or silver dish, put the custard in the hollow, heap over it the shredded pineapple, and surround with a thick wreath of whipped cream. Serve all very cold.

SOUPS.

Cream of Tomato Soup.—Take a

STORIES OF THE LATE KING

HIS FAVORITE HYMN.

King Edward's favorite hymn was "Nearer, My God, to Thee."

HIS SADDEST MOMENT.

The saddest moment the late King ever experienced was at the deathbed of Queen Victoria. "I feel as though the whole world was filled with a great darkness," was His Majesty's remark.

"IF HE WERE DEPOSED."

His Majesty was once asked what he would do if his family were deposed. He replied: "No doubt if it really did occur I could support my family by lecturing on the Constitution in America."

HIS FAVORITE FLOWER.

King Edward's favorite flower was the rose, and his favorite name Louise.

AS A COLLECTOR.

The late King was a collector of walking-sticks, of which he possessed many historical specimens. He also collected matchboxes, caricatures, and model ships.

IN HIS MOTHER'S STEPS.

"It will be my constant endeavor to walk in my mother's footsteps," he stated when he came to the throne.

"A FORTUNATE MAN."

"I have been a most fortunate man," he wrote to one of his subjects—"heir to great throne and yet able to enjoy liberty. I have an admirable mother, an exquisite wife, charming children, and a whole nation to love and to please."

HORROR OF GAMBLING.

"I have a horror of gambling," King Edward wrote to Archbishop Benson, "and should always do my utmost to discourage others who have an inclination for it, as I consider that gambling, like intemperance, is one of the greatest curses which the country could be afflicted with."

A CRUEL "SPORT."

King Edward would never countenance pigeon-shooting. He also converted the Royal Buckhounds into a pack of fox-hounds in order to disconcert the keeping of tame deer for the purpose of so-called "sport."

ALWAYS "HIS PEOPLE."

"Will my people ever forgive me?" were the late King's first words when he was told that he would have to submit to an operation and the Coronation festivities would have to be postponed.

WHEN HE WAS UNHAPPIEST.

"I am unhappiest," he wrote, "when I have to attend some social function where I must smile as pleasantly as though I never had a pain in my life."

HIS "PET AVERSION."

In a "confession" album belonging to the Queen of Greece His Majesty thus described his "Pet Aver-

Henry Wood. He read "East Lynne" while touring in Palestine with Dean Stanley.

A CLEVER LINGUIST.

King Edward could speak several languages with equal facility. When one hundred delegates of the International Association of Academies visited Windsor in 1904, his Majesty shook each delegate by the hand, and spoke to him cordially in his own language.

HIS WONDERFUL MEMORY.

"I have an excellent memory, real treasure for a prince," he once remarked to a prominent author. He recalled faces and names with unerring accuracy. Whoever was presented to him, no matter how great or how humble a personage, or under what crowded, changing surroundings, he was able to recall the exact circumstances of the presentation years afterwards.

AS A SPEAKER.

King Edward had a strong, compelling voice, almost unrivaled in the two houses for clearness and penetration. Queen Victoria had his Majesty taught elocution when he was very young. One day she inquired how he was progressing. "I regret to say," said the tutor, "that I cannot get rid of the Prince's German accent; and when he's older and has to speak in public the people will not be pleased with it." The Queen, therefore, ordered that the future King should give a daily reading before her in pure English.

A JAPANESE REST CURE.

Puzzling Over Metaphysical Problems for a Year.

The Japanese are catching up with us. They now enjoy the blessings of nervous prostration and are practising their own form of rest cure. The Japan Magazine tells of this latest step in progress.

A lady by the name of Kawakita last autumn was threatened with a nervous collapse which necessitated a visit to the seaside, and being at Kamakura she was persuaded to enter upon the form of rest cure practised under the direction of a priest of the famous Kenkoji temple.

"It was on October 3 last," says she, "that I made the acquaintance of the Kwanchosama, the director of the retreat. He acceded very kindly to my request to join in the exercises, and after asking me many questions about my life and about the beliefs I had hitherto entertained as to gods and Buddhas gave me a subject for meditation.

"The subject was 'Honrai no Memmoku,' and was told to think about it until I had discovered its meaning or thought I had done so. When I had solved the problem I was to come again to the director, who would either give me a second problem or send me back to think over it again.

"The problems thus given are not of a nature to be easily solved. I cannot tell you the meaning of the particular one propounded to me, because I am not allowed to divulge the secret; it will suffice to say that some people will think over one of these formulas for a year or more without coming to a satisfactory answer.

"It was very difficult for me, with

Fashion Hints.

TOILET ACCESSORIES.

Speaking of different ideas in costumes makes one think of pretty accessories to the toilet, in the way of belts, ruffs, stockings to wear. Printed stockings are among the delights of the summer girl of 1910. Some meant for wear with white pink blossoms about an inch in diameter printed thereon. A drop-stitch effect in bars lightens the background for the flowers.

Of neck ruffs there is no end of lovely frilly choices. They come in all colors. Some of the ruffs have a draping in front of soft taffeta to form a cravat. Others are tied in the back with bows of ribbon to match the tulle. The long-beloved ruff of ostrich never seems to go out of popularity. It is still shown, short and closed with loops of ribbon.

Belts become more and more a necessity of the toilet, since the separate waist has come back in favor. Those of soft black suede are extremely chic and becoming. One of the smartest designs in white belting is silk moire embroidered in filo silk, after the design, which may be a scroll outline, for example, has been heavily padded.

The very latest notion is a hatpin of wood, on which a carved monogram stands up in high relief. Button molds in the large hat sizes and with a slightly rounded top are used for the carving, as the wood of which these molds are made is hard and does not slip readily. After the monogram has been outlined in pencil the wood around it is cut away and a finish of shellac completes a very attractive ornament. The pin itself is sunk in a hole bored in the reverse side of the button and a smaller button placed against the larger one and glued fast steadies the pin in place.

The "cretonne girl" is trimming her hat to match her waistcoat, jumper, girdle, belt and collar sets.

With whatever materials she has left she fashions a bag which is mounted on the gilt frame of a shopping purse that is out of commission because its handles are broken and its leather sides shabby. This does not matter, because she throws the leather away and substitutes cretonne bands for the broken or worn handles of leather.

If the "cretonne girl" is unusually energetic she may contrive a parasol to match her other flowered accessories by carefully matching the cretonne figures upon the gores of an ancient parasol cover and then mounting it upon the original frame.

SOME SMALL FLOWERS.

"The larger the hat the smaller the flowers," remarked an observing woman the other day. Of course the flower-trimmed hat is an established fact. Summer glory is never quite so happily epitomized as when the colors and form of the garden and field are flaunted on

pineapple, and surround with a thick wreath of whipped cream. Serve all very cold.

SOUPS.

Cream of Tomato Soup.—Take a can of tomatoes or fresh ones. Rub through sieve. Heat to boiling point; thicken with corn starch. Make a cream sauce by rubbing a large spoonful of flour in a spoonful of butter, cooking over the fire till it is smooth and bubbles up. Add milk to make it thick. Mix the two together, season with salt, butter, and a little bit of sugar. Cream tomato soup made this way will never curdle.

Riced Oyster Soup.—Wash one cupful of Carolina head rice and put over the fire in plenty of water to keep it "tumbling" until tender but whole. Drain the water. (This water can be used as nutritious drink for children or invalids in place of milk.) Cover the rice with milk and place in covered pan of water to steam or in steamer a half hour. Take one quart good sized oysters and fork singly into a shall w dish with cover. Salt, pepper (red preferably), and dot generously with butter. Pour the oyster liquor into a double boiler and add three pints of milk. When this is quite warm, not hot, place the covered oysters over slow fire and shake gently two or three minutes, or until plumped. Turn into the hot milk and add the steamed rice. The oyster flavor will be different from the usual soup.

APPETIZING DISHES.

Hard Gingerbread.—One cupful of sugar, one cupful of molasses, two-thirds of a cup of butter, two-thirds of a cup of sour milk or buttermilk, two teaspoonfuls of ginger, two teaspoonfuls of soda flour to roll. Roll thin and bake in quick oven.

Fruit Sandwiches.—Chop one pound each of raisins, figs, and dates, mix, and over the mixture pour a wine glass of orange juice, and spread between the slices of buttered bread.

Banana Salad.—Put half box of gelatin in one cupful of cold water, and let dissolve. Then add two cupfuls of boiling water, set on stove until all is dissolved, add one cup of sugar, after which take off. Slice six bananas in same and pour in a dish to cool. Serve with whipped cream.

Caramel Filling.—Two cupfuls brown sugar, one teaspoonful of flour rubbed well in sugar, butter size of a walnut, one-half cup of cream. Boil all together until waxy. Flavor with vanilla.

Rice Croquets.—Put over the fire in a double boiler a pint of milk and half a cupful of picked over and washed rice. Cook until thick, add the yolks of two eggs, half a teaspoonful of salt, and two tablespoonfuls of sugar. Remove from the fire, then beat until smooth, adding half a teaspoonful of vanilla, or he grated yellow rind of half a lemon. A bay leaf boiled in the rice and milk and removed as soon as a slight flavor is given adds to the daintiness of seasoning. Spread all on a flat dish and when cold form in cork shape, dip in egg, then in crumbs and cook in deep boiling fat. This will make twelve ordinary sized croquets.

pleasantly as though I never had a pain in my life."

HIS "PET AVERSION."

In a "confession" album belonging to the Queen of Greece his Majesty thus described his "Pet Aversion"—"The most objectionable being in the world, in my opinion, is the man who will insist on pointing at you with his umbrella, and shouting out, 'There he is!'"

A MASTER OF TACT.

King Edward was admittedly the most tactful man of his age, and he never exhibited this quality to greater advantage than during his tour in India, when he showed perfect knowledge of the native princes' complicated ranks and genealogies, the antiquity of their families, and the gallant deeds of their ancestors.

HIS FEARLESSNESS.

A meeting of Irish dynamitards in New York passed a resolution in March, 1885, that "The Prince of Wales is an alien intruder, merit- ing death by all the laws if he set foot in Ireland." His answer to this threat was a visit to Dublin in the following month.

THE PEACEMAKER.

The building up of the entente cordiale was a work of the greatest pride and satisfaction to King Edward. "The friendship and admiration which we all feel for the French nation and her glorious traditions," he said, "may in the near future develop into a sentiment of the warmest affection and attachment between the peoples of the two countries. The achievement of this aim is my constant desire."

LEADER OF FASHION.

His Majesty had immaculate taste in dress. On the Continent especially the style and cut of his clothes were generally imitated and in Paris the shop windows were often filled with garments labelled "Au Roi Edouard."

MANY-SIDED MONARCH.

The late King was: Barrister, Field-Marshal, Admiral, Trinity Brother, Doctor of Civil Law, Fellow of Royal College of Physicians, Doctor of laws, Farmer, Cattle Breeder, Horse Breeder, Scientist, Fireman, Doctor of Music, Fellow of Royal College of Surgeons.

AS A BOOKMAN.

His Majesty was a keen reader. Old black-letter volumes, early editions of the English classics, and books on sport especially appealed to him.

Another interest of his Majesty's was shown by the number of books in his library dealing with famous wars, the Crimean War being most fully represented. His Majesty once went all over the principal battlefields in the Crimea.

A ROYAL REFORMER.

"The housing of the working classes," said King Edward, "is a subject in which I have long taken a deep interest. As long ago as 1884 I was a member of the Royal Commission on the subject, and I had an opportunity then of becoming acquainted with the evils attendant upon the existence of insanity dwellings. I then personally informed myself of the conditions actually existing, by visiting, in several parts of London, some of the most unhealthy districts."

HIS FAVORITE NOVELIST.

His favorite novelist was Mrs.

me, because I am not allowed to divulge the secret; it will suffice to say that some people will think over one of these formulas for a year or more without coming to a satisfactory answer.

"It was very difficult for me, with my family care and household duties, with servants, children and visitors coming to interrupt me, to devote my whole attention to the problem assigned me, but fortunately I have been able to avail myself of stated periods of quiet.

"Once a month from the beginning of October to the end of March there is a retreat (seishin) held at the Kenkoji to which all students of the contemplative life are all wed to go. The retreat lasts for a week and during that time the male members live entirely at the temple, the women in private houses or their own homes.

"Hours of silent contemplation are observed, beginning at 7 o'clock in the morning and spread over the day till about 6 in the evening—five hours of silence in all, with the director sitting in the next room to receive communications and to furnish us with fresh problems when necessary.

"I had to leave the house early in the morning with a chochin (lantern) to light me; it was 10 o'clock in the evening before I returned. Our meals during the day were supplied from the temple; for breakfast tea, rice gruel and relishes; at midday rice, kenchin soup and vegetables boiled in soy; in the evening tea and rice gruel.

"The most important of these meetings was the one in January. During the course of it I had the good fortune to solve my first problem. The second problem given me was 'Kane no ne wo tomeru,' how to stop a bell from sounding.

"The rest cure is now over. I have come out of it fortified in body and in mind. I am no longer nervous and irritable; I am able to look at things more passionately and feel myself more fit than I was before to cope with the difficulties and worries of life."

THE OFFICER KNEW.

A story is told concerning two travellers who found themselves in a Prohibitionist State, and were discussing the question of how to obtain alcoholic liquor, when a pleasant-looking policeman appeared and wished them "Good morning."

"I say, Jim," said one of the travellers, "let's ask the officer."

"Follow me," said the constable, and he conducted them in and out and round about until they stood in front of the cathedral. The travellers looked at each other in astonishment.

"Surely, my good man," said the first, "you do not mean to tell us that we can obtain what we want in a church?"

"You see the church, do you?" said the policeman, solemnly.

"Yes," assented the two.

"Well, that's the only place in this State where you can't get it."

Standing in their own light many men complain that the way is dark.

Many a teacher makes his mark on the rising generation with a birch rod.

The shallower the man the deeper the world seems.

the flowers," remarked an observing woman the other day. Of course the flower-trimmed hat is an established fact. Summer glory is never quite so happily epitomized as when the colors and form of the garden and field are flaunted on millinery.

The latest importation of models emphasizes the diminutive flowers. Lilies of the valley are extremely popular. They are used in bunches on large, flat hats in which the white tone predominates. Then again, the lilies are fashioned into an entire crown on large lace or straw shapes. When combined with pale-green leaves they occur turbas in fascinating cabochons.

Whatis bunched in attractive manner on the crowns of many hats. Fine grasses rise at the side, giving height and the lines of the aigrette without the necessary cruelty entailed.

Tiniest roses are used as an entire facing on some hats, and this can be on either under or upper surface. Buds are favored for the sides while the old-time size of the silk-made roses are used to outline the crowns of hats of the Eugenie style.

Forget-me-nots, violets, tiny cornflowers and fine mignonette are proving the power of small flowers.

SOME ROYAL HOBBIES.

Late King Edward Was a Collector—Queen Alexandra's Books.

The late King, as everybody knows, had a weakness for walking sticks, but another collection in his Majesty's possession will have a unique interest in the future, says the Woman at Home.

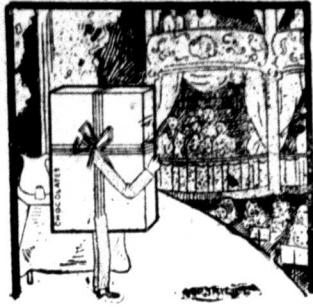

This consists of relics gathered together from every war in which British soldiers have fought since the early days of Queen Victoria. The King had also a quaint assortment of the programmes of every opera, play and concert which he had attended. One would imagine this to be a bulky collection.

Queen Alexandra collects many things—lace, china, crystals and tiny objects made in precious and semi-precious stones; but her greatest treasure is a collection of books, most of which came to her by inheritance. When Princess of Wales she received the Mitchell bequest, that took the form of a choice collection of books valued at £10,000.

And afterward the late Sir William Fraser bequeathed to her Majesty a splendid collection of books, papers and pictures which dealt with the subject of women's dress during the last century. The Queen has also a vast number of volumes of modern literature.

Dr. Blank, a professor in the University of Virginia, was on the eve of a trip to Europe, to be absent two years. In pathetic and rather harrowing tones he made his farewell address to the class:—"Yes, I am about to part from you. This is more than distressing me. Would that there was a window in my breast, my dear boys, that you might see the innermost recesses of my heart." A stripling in the rear, seized with a happy thought, shouted:—"Professor, would a pain in the stomach do?"

The more scandalous the gossip the faster it flies.

WESTERN GRAIN CROPS.

Winnipeg, June 17—The condition of the growing crop in the Canadian west to-day is being watched with considerable interest by all. The cold weather which prevailed towards the end of May, while it checked growth to a certain extent, caused grain to stool, and an extensive root system to be developed, the result being that with the arrival of warm weather, which has prevailed over the entire country for the past ten days, rapid growth has been taking place and crops are considered to be, if anything, a little in advance of what they were at this time last year. The average height of spring wheat is from five to eight inches, and, from all reports, is coming along splendidly. Seventy-five per cent of the barley crop is sown and practically all of it is already above ground. A large increase in the acreage has been devoted to flax, which is also doing very well. Frosts which were so frequent few weeks ago, appear to have done very little damage, the chief cause of complaint being drifting of light land on account of the tremendous wind that has prevailed throughout the whole west during the last week, but more is needed, and in certain places farmers claim that it is needed immediately. The consensus of opinion, however, is that the prospects for the future are of the brightest.

BEST FOR AGED PEOPLE

Here's a Kidney Treatment We Want
You to Try at Our Risk.

With advanced age comes derangement of the kidneys and associate organs. Nature is unable to perform her proper functions and requires certain outside aid.

We are so confident we have the aid so essential for restoring strength, activity and health to weak or distressed kidneys that we are willing to supply it with the positive understanding that it shall cost the user nothing whatever, if for any reason it fails to give entire satisfaction.

After a thorough experience with the most successful kidney treatments, we are satisfied that Rexall Kidney Remedy is the one preparation which embraces all those qualities so necessary for giving prompt and permanent relief in all classes of kidney and urinary ailments.

Inasmuch as a trial of Rexall Kidney Remedy can be had at our entire risk, there is no reason for anyone hesitating to put it to a practical test. Why not try a bottle to-day, on our guarantee? Two sizes, 50c and \$1.00. Sold only at our store—The Rexall Store. T. B. Wallace.

SPEAKING FACTS.

Every little while facts come to light which speak in far-reaching tones of the value of cow testing to the dairy farmers.

For instance, a letter is just received at the Department of Agriculture, Ottawa, from Mr. George Wise, of Shell-

THE LEGISLATIVE JOKER.

Easy Way In Which the Intent of a Law May Be Changed.

"A joker in its simplest form consists in a word or a clause which, introduced into proposed legislation, flies away from the public its power to establish such laws as it desires either by emasculating an enactment or by perverting the essence and purpose of it." So writes Samuel Hopkins Adams in American Magazine, and he cites these instances of how the joker game is worked:

"Sometimes it is in one word, as where the sale of a piece of public property to the lowest bidder was once authorized. Sometimes it may inhere in that elusive character, the comma, as in the case of the tariff clause of an old schedule providing for the free entry of fruit plants, where somebody carelessly allowed a comma to creep in between 'fruit' and 'plants,' thereby admitting millions of oranges and lemons into the country duty free and costing the treasury hundreds of thousands of dollars in loss of imports. Nobody ever found out whether this was a printer's slip or a carefully devised scheme. Certain it is that the framers of the schedule never intended it."

"Again, the entire body of the proviso may constitute the joker by purporting to carry one meaning when it in reality carries quite another. Congress still preserves the tradition of the Irish representative from Massachusetts who proposed that March 17 be made a legal holiday in celebration of the 'Boston tea party.' Several New Englanders whose zeal exceeded their erudition warmly supported the measure until some one pointed out that March 17 was much more closely associated with the supposed birth of the proposer's patron saint than with the destruction of the obnoxious tea, which latter, indeed, was a midwinter festival."

SWISS DIVORCE CASES.

The Court Always Tries to Settle
Them by Reconciliation.

In one important respect the Swiss surpass other nations in the management of their divorce cases, says an English correspondent.

In every town there is a kind of official paper known as the *Feuille d'Avis*, in which one may read daily the following announcement:

"M. and Mme. X., who are in instance of divorce, are requested to appear privately before the judge, alone or with their lawyers, in order to come to reconciliation if possible."

Before the beginning of every divorce case in Switzerland this notice is published and sent out to the interested parties, leaving the couple, of course, free to attend before the judge or not, as they wish. Often the couple meet.

Although there are no statistics published on the subject, I am told by a leading lawyer in Geneva whose specialty is divorce cases that at least 30 per cent of divorce cases—"much to my loss unfortunately," the lawyer added, with a smile—are settled by the paternal advice of the judge at these meetings out of court.

In fact, Swiss lawyers will not definitely take up a divorce case until it has passed through the reconciliation process.

If one of the couple does not attend the rendezvous this means that the affair is to be fought out, but in any case Swiss divorces are not expensive.

The average cost in a contested case is \$200, often \$100, and the lowest when both parties are agreed \$10 or even \$5.

light which speak in far-reaching tones of the value of cow testing to the dairy farmers.

For instance, a letter is just received at the Department of Agriculture, Ottawa, from Mr. George Wise, of Shellmouth, Man., which reads as follows:

"I am pleased that I was led to see what my cows are doing, though not only just entering my second year of recording each cow's doings I see there is a great difference in the returns from the creamery and of course it is there we should find the change. Note the remarkable gain for the first four months of 1910. In 1909, from January the 1st to April the 30th, we were milking 9 cows and received \$129.59 for cream cold. In 1910, during the same period, we milked only eight cows and sold cream for \$229.43. Further, we made butter this year for a household of nine persons, last year we bought our butter. These are actual facts. The only difference in feed from last year is that I have fed bran extra all winter, but I have sold cows that were poor ones, though one of them made a good showing the first six months of the year. The cows picked up wonderfully on a soiling crop in September, the returns show it and every animal went into winter quarters fat."

It will be noted that Mr. Wise, besides the butter used at home, made an extra hundred dollars in four months with a smaller herd. The cows are being selected, the records show which cows to keep and the fact that records are kept induces the owner to look after the herd better in every way. Cow testing pays.

Cordially Invited.

Glasgow invitations are nothing if not hearty. Two friends met after a fairly long separation.

"Man, Tam," says one, "whaur in a' the airth hae ye been hidin' yerself? I havena seen ye for an age."

"Weel, Jeems, I've been doon Gourock way a guid while. Come doon an' see me sume. I've got a set of good boxing gloves, an' if ye come doon any day I'll knock the face off ye."—London Tit-Bits.

The Other Way.

"You may pay me \$100 down and \$25 a week," said the physician offhand.

"Sounds as if I were buying an automobile," the patient said.

"No," said the doctor thoughtlessly; "I am."—Buffalo Express.

is to be fought out, but in any case Swiss divorces are not expensive.

The average cost in a contested case is \$200, often \$100, and the lowest when both parties are agreed \$10 or \$15.—San Francisco Chronicle.

Be a Real Power in the World.

It is a great thing to start out in active life with the resolution that you will not be a mere cipher in your community, but a real constructive force; that you will stand for something more than a real living getter or a dollar gatherer; that you will not be merely one more citizen, but a strong, robust, vigorous force, a power respected, a force that moves things. To be known as a progressive man who stands for everything that is for the betterment of his community, every one should be ambitious to be something as a citizen besides a specialist in his vocation.—Success Magazine.

The Wild Beet.

Beets were first found growing wild in sandy soils near the sea in Europe and western Asia. The wild beet still found there is regarded by authority as the original type. This wild beet is slender rooted and has a taste so different from the beet we know today that one must consider the first man who tasted one and thought it possible to develop bad gifts of hope and imagination far beyond ordinary. The beet has been cultivated since 2000 B. C.

Handicapped.

The second Duke of Wellington was handicapped through life by his father's fame. Bernal Osborne once asked him why with his undoubted talents he made no effort to shine in public affairs. The duke replied: "If you had sat so long as I have under the shadow of a great tree you would be as colorless as I am."

Too Clever.

Hotel Clerk—Let me see. You're the Mr. Burne who acts Romeo, aren't you? I think I've seen you climb down from Juliet's balcony. Burne—I am that famous actor, sir. Hotel Clerk—Cash in advance, please. You climb too well for any other stems.—New York Journal.

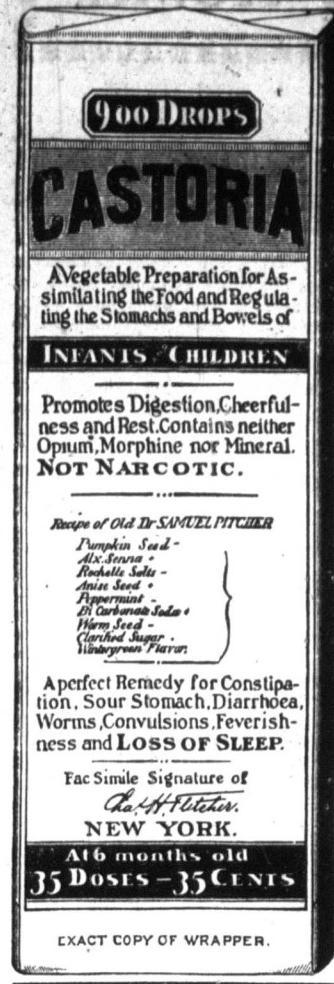

Political Burglaries.

It was through a stolen document openly seized by the British ambassador in Berlin that the British Government first learned of the recognition of the independence of America by France. The British Minister was Hugh Elliot, and he had the desk of the French Minister forced open to obtain the copy of the treaty he wanted. In 1855 a sensation was created by the discovery of a plan by which secret documents were systematically abstracted from the Russian embassy in Berlin, being copied at night in the interests of another nation and replaced in the drawer at the embassy in the morning. The burglaries had been taking place for two years before they were discovered.

Not Much Work.

"Some folks think that people in the show business have an easy time of it," said a minstrel star, "and that reminds me of what an old farmer in a little town said one day as he saw me carrying the bass drum in the minstrel parade. We had walked nearly five miles in the hot sun, and I was about ready to drop. That big drum was heavy. When we reached our car after the parade my feet were sore, my back ached, I was perspiring all over my face and was completely tired out. As I almost staggered past the old farmer he looked at me contemptuously.

"'Huh,' he said, 'these actors'll do anything to get out of workin'.'"

PILES CURED at HOME by New Absorption Method.

If you suffer from bleeding, itching, blind or protruding Piles, send me your address, and I will tell you how to cure yourself at home by the absorption treatment; and will also send some of this home treatment free for trial, with references from your own locality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write to-day to Mrs. M. Summers, Box 851, Windsor, Ont.

BRAZILIAN RAILROADS

Find It Necessary to Plant Forests to Meet Their Timber Needs.

Brazil is far from having the amount of forest with which it is generally credited in North America and Europe, though it has enough to supply all needs under normal conditions. The fact that the trees of value are so greatly scattered in the forests, that so many of them are heavier than water and cannot be floated, and that the cost of transportation is very high combine to make it impossible to supply most portions of the country with lumber and logs for industrial and railway purposes. The result is that not only is a large portion of the building lumber imported, but there are imported many timbers for bridge

THE TERRIBLE BATHOLITE.

Molten Rock That Bores Upward Through the Earth's Crust.

Batholiths is a term invented by the great German geologist Eduard Suess to describe the gigantic intrusions of molten rock which, according to him, bore their way upward through the crust of the earth from the "eternal depths" below, cutting through the strata and folds of the mountains very much as a white hot soldering iron may be thrust through a plank, burning its way across the grain of the wood as if it were cheese.

These batholiths lurk deep in the earth, where the temperature is thousands of degrees, and gradually melt their way to the surface above them. Generally they issue in the form of tremendous domes of hot rock, towering up to mountain heights and often giving birth to volcanoes. When a batholith, as sometimes happens, does not reach the surface its roof opens in a network of fissures, lava pours out and a whole group of volcanoes appears at that point.

Suess has recognized the remains of many cooled batholiths on various parts of the earth's surface, and he says that the consolidated crust of the earth, even at the present day, may be exposed to these mighty intrusions from below. The batholiths bring up with them many metals from the interior of the planet, and rich mines are often opened in the dikes that are thus formed.

Suess describes the rock about Dani-

MEN OF ACTION.

The Story of a Perilous Rescue Expedition In Alaska.

In the rush for Alaska gold men did not forget to be ready to help the unfortunate. The author of "Trailing and Camping In Alaska," Mr. A. M. Powell, narrates an incident that occurred at Valdes. The place was overcrowded with prospectors and miners, food was scarce, and there was a good deal of sickness. Many had come over the glacier, and others had lost their lives in the attempt.

A dog team galloped up and stopped in front of the only pretense of a hotel at Valdes. The night was dark, as the northern winter nights always are when the moon is not shining. The dogs immediately lay down, almost exhausted from their long trip, and the two men were soon surrounded by inquiring friends. One of the two said:

"What do you think fellows? Just this side of Sawmill camp we passed a woman who was pulling a sled on which was her sick husband. We remonstrated against the undertaking of crossing the glacier, but she replied that they might as well die up there as anywhere else, as it meant certain death to stop. Our dogs could only pull our outfit, and there wasn't grub enough for all, so we were compelled to leave them. They will be at the last timber to-night, and if somebody does not go to their rescue they will be dead by this time tomorrow."

A man stepped out from the crowd and said:

"I'll go for one. Now, who else has a good dog team to splice in with mine?"

"I'm your huckleberry," announced another.

It was 3 o'clock in the morning before they had made their selection of dogs and were ready to start on that hazardous trip.

"There goes the best dog team in Alaska and driven by the best two men on earth!" exclaimed a man as they turned a corner and were gone.

The trail was easily followed, and soon the nine miles of level bench were passed. The speed slackened only when they were ascending the summit, which they reached by 11 that morning.

Down, down the steep descent they plunged, and by 1 o'clock were off the glacier and skipping over level ground. The poor woman had pulled the sled until she was exhausted and had sat down beside her husband. She was bidden to seat herself comfortably, while they fastened the two sleds together. Soon they were bounding away at such a rapid rate of speed that the woman wept for joy. When they recrossed the summit the whole range was "smoking" and the wind was sending the fine snow along the crust.

"Twenty miles to town, and it can never catch us," said the driver.

Townsmen anxiously waited and watched the trail. As the team rushed up they were surrounded by eager, helping hands. They were saved by men not of good intentions only, but by men of instant action.

Sightseeing.

On a visit to his grandmother Harry examined her handsome furniture with interest and then asked, "Grandma, where is the miserable table that papa says is always kept?"—Success Magazine.

An Extremist.

A London bookseller recently received this order from a customer: "Please forward me a copy of Tennyson's poems. Do not send one bound in calf, however, because I am a vegetarian."

supply most portions of the country with lumber and logs for industrial and railway purposes. The result is that not only is a large portion of the building lumber imported, but there are imported many timbers for bridge and other construction work which in the ordinary course of affairs should be Brazilian. One of the most striking demonstrations of this state of things appears in the immense sums of money expended by Brazilian railways for ties, and the great trouble had by such companies in securing proper supplies of such timber at any price.

In order to reduce the cost of the ties and to insure a proper supply, the principal railways of the country are being compelled to give their attention to the planting of forests for supplying ties, in a manner even more advanced than that followed by a number of the great railways of the United States, which are nearly face to face with similar conditions.

The Poulista Railway Co. in southern Brazil is now experimenting with a scheme to avoid further trouble. A nursery of 250 acres was established at Jundiahy in 1904 and planted with 40,000 trees, of which 30,000 are eucalyptus. Two other tracts, of 65 acres each, were also planted with eucalyptus, the total number being 20,000. The company now has 60,000 trees, of various kinds, and the expenditures in five years, including the purchase price of the ground, have been \$45,000. It has also acquired 3,250 more acres of fine land and on this and other available lands it is planned to plant 1,000,000 eucalyptus trees. As present improvements on the land last purchased will produce sufficient revenue to pay back the capital expended in buying it, it is estimated that the total cost of this experiment in forestry, which will be completed in 15 years, will be \$150,000, or 15 cents a tree, while the returns on each tree when cut up will be 20 times its original cost. It is also estimated that the 1,000,000 trees will prove an ample and continuous resource for fuel and sleepers for all the company's lines, thereby saving the company approximately \$300,000 a year.

Dropsy— Given up by Doctor

"I had dropsy, and was told by my family physician that there was no chance for me. My family also gave me up. My limbs and body were swollen one-third larger than natural, water collected around my heart and I had to be propped up in bed to keep from smothering. I took Dr. Miles' Heart Remedy until I was entirely cured. This was in 1902, and I am now able to do any kind of work on my farm. My cure was certainly marvelous."

L. TURLEY CURD,
Wilmore, Ky.

Dr. Miles' Heart Remedy has been wonderfully successful in relieving heart trouble. Its tonic effect upon the heart nerves and muscles is a great factor in assisting nature to overcome heart weakness.

Price \$1.00 at your druggist. He should supply you. If he does not, send price to us, we forward prepaid.

DR. MILES MEDICAL CO., Toronto,

from below. The batholites bring up with them many metals from the interior of the planet, and rich mines are often opened in the dikes that are thus formed.

Suess describes the rock about Boulder, Colo., as an ancient batholite, which covers 5,000 square kilometers of surface. But there are others still more prodigious in extent.

Sometimes they have been worn down nearly to the general level, but near Elkhorn the old batholite yet towers up to an elevation of 9,000 feet above the sea. The diamond dikes of South Africa have thus been thrust up from the profound depths of the earth, where there exists a laboratory of nature in which she performs what seem miracles to the petty inhabitants of the planet's surface.

The face of the moon shows us most clearly what batholites are capable of.

The vast circular plains ringed with steep mountains, which make its surface so marvelous to look upon with a telescope, have, according to this view, been formed by intrusions of colossal batholites, and Suess calls them by the startling name of "smelting furnaces"—furnaces thousands of square miles in extent—in which the frame of that little world has been melted and dissolved like a snow bank lying in the path of a flow of molten iron.

And if we could remove the sedimentary accumulations of ages from the face of our world, says this astonishing German savant, we might find now hidden under our feet a network of the seared skeletons of ancient batholites, grander than any on the moon!—Garrett P. Serviss in New York American.

Von Moltke's Simplicity.

Once while traveling General Moltke entered a small Swiss hotel, and as the head waiter saw his gaunt figure stalking in, wrapped in a wornout, dusty cloak, carrying an old leather satchel, he measured his wealth by his looks and ordered his assistant to show him to a small room in the uppermost story. As he was making himself comfortable in the attic another assistant came, as is customary there, to ask the silent stranger his name and rank. The consequence was that a few minutes later the proprietor, in full dress, appeared at the door of the attic to inform his excellency that a better room had just been vacated.

"Give that to my servant," replied Moltke, "when he comes with my carriage. This is good enough for me." And he remained.

The Silks of Samarkand.

The silks and velvets of Samarkand, long famous for the rainbow blending of their colors, have a season, exactly like fruits or garden truck, and can only be purchased at that particular time of the year. When the worms are ready for spinning they are all brought to the silk bazaar and sold. The silk is then spun and dyed, and all that is not used in the maker's family is exported in the form of cloth. Thus, unless you happen to be in Samarkand during the season, it is all but impossible to find any of the native silk for sale except in the form of ready made khaists, which are a sort of glorified dressing gown.—E. A. Powell in Everybody's.

Save Babies' Lives. For Babies and Small Children. (Made in France.)

Dr. Hennequin's Infant Tablets saved our little girl's life. Three doctors said she could not live. The Tablets cured her.—Mr. E. R. McBRIDE, Napanee, Ont.

My baby was so weak from sickness that he could hardly walk. We thought he would die. We could find nothing to help him. I was given a sample package of three Hennequin Tablets; we used them. I saw a change at once. We secured the Tablets and our baby improved every day, and is now a bright, fat, good natured boy; you could not believe he was the same child. They certainly cured my baby and saved his life. I believe them to be the best medicine ever sold for babies. Mothers if your babies are not well take my advice and try these Tablets.—Mrs. JAMES RIDDELL, Barrydale, Ont.

We have hundreds of such letters. If the Tablets were not what you need we would not offer to give them away and pay them. If your baby is not well send for trial package.

Hennequin Tablets have the letter "H" stamped upon them—this is your guarantee.

All dealers, 25¢ per package, or \$1.00 sent postpaid to any address.

DR. MILES MEDICAL CO., Toronto,

FIGHTING A CROCODILE.

An Exciting Adventure In a Chinese Timber Camp.

A chance visitor to a Chinese timber camp has related in Chamber's Journal an extraordinary adventure with a crocodile, in which the crocodile came very near having the best of it. "Arriving in my boat at the little jetty or landing place, I was astonished to find Graham, the white man in charge of the camp, lying on a rattan couch within a few yards of the bank, with a heavy express rifle across his knees, gazing intently at a rough fence erected in the stream.

"Throwing myself down near him in the welcome shade, I learned the following story:

"Two nights before Graham was sleeping peacefully in his little palm leaf house in a clearing about twenty yards from the river bank, when his dog began to growl. Graham turned out and walked round the hut to ascertain the cause of the disturbance, but, seeing nothing, addressed himself to the dog in his usual vigorous sailing ship language and retired to bed again.

"Five minutes later he was once more aroused by a yelp from the dog, and this time, really annoyed, he seized a stick and saluted forth to inflict punishment on the disturber of his dreams. Suddenly a dark form glided swiftly from the shadows, and Graham felt himself seized by the right knee as in a vise. Stooping to free himself, he found he was in the grip of a large crocodile, whose teeth were firmly embedded in the flesh.

"Backward and forward the struggle swayed, the crocodile striving to pull its destined victim to the water's edge and Graham, hampered as he was by his imprisoned leg, fighting for his life to reach higher ground. At last the beast, hurling its victim to the ground with a shake of its powerful head, began to drag him swiftly toward the water.

"Poor Graham, feeling, as he expressed it, that it was 'all over bar the shouting,' determined to make one last effort for his life, and, taking advantage of a momentary halt as the brute was steering past a tree stump, he sat up and succeeded in getting both his thumbs into the reptile's eye sockets—the only vulnerable part of a crocodile's head.

"The rest of the story is perhaps best told in Graham's own words, or as nearly as circumstances will permit:

"As soon as I gets my thumbs made fast in 'is eyes, 'e opens 'is mouth to shout an' lets go my leg. Then first thing next mornin' the coolies lays 'is breakfast for 'im, as you see, an' I gets into this chair an' era I stays, if it's a month."

"Vainly I tried to persuade him to come away with me to the next station and see a doctor. I argued with him, I implored him, but it was absolutely useless. He refused to move from that chair till he had bagged his crocodile, and I was at last obliged to leave him, having dressed his leg and exhausted every known means of persuasion short of brute force.

"I met him again a week later in a hospital bed, suffering severely, but quite happy in the knowledge that the bones of that crocodile were bleaching in the sun outside his house."

The Disappointed Prodigal.

Slowly, with bowed head and faltering step, the prodigal son walked up the garden path.

His father, an old man, wrinkled and white-bearded, stood at the door.

"Father, father," cried the P. S., "I've come home to die!"

"Just my luck!" groaned the old man. "I let your insurance policy lapse last month!"

No veal.—London Tatler.

Pocketed the Silver.

There is an amusing anecdote regarding Lord Crewe how on one occasion at a charitable entertainment he leaned against a corridor wall and went fast asleep with his hat in his hand. Some young fellows started dropping half crowns and coppers into the hat from a balcony above, and the chink of the coins woke him up, when he promptly pocketed all the silver and pelted his impromptu benefactors with the pence.—London M. A. P.

A Wink in the Dark.

There was to be an attack by night. The darkness was impenetrable. A sergeant addressed his section as follows: "Now, pay attention, No. 2 section. We are going to do a night attack. There'll be no talking or smoking. If there are any orders to be passed down I will just tip you the wink!"

It is a great misfortune not to have mind enough to speak well or judgment enough to be silent.

THE UMPIRE.**Did You Ever Hear the Fans Cheer Him For His Work?**

There is one unique phase connected with the life of the umpire which perhaps has never occurred to most lovers of baseball. You have often been to a theater and seen the hero or heroine—yes, even the villain—win round after round of applause for some excellent bit of acting.

You have been to a football game and heard some ball gladiator cheered to the echo for making a long run that resulted in a touchdown or for a flying tackle that prevented imminent defeat. When some player is injured they convey their sympathy to him by cheering his name.

You have been to a ball game and heard the fans cheer some crack pitcher because in a pinch he fanned some mighty batter. It's just the natural way of the American to show admiration and appreciation.

Rack your brain, think your hardest, recall every game you have ever attended, then see if you can remember a time when the umpire drew applause for his work. Have you ever heard the fans cheer the name of the umpire after he has worked a fifteen inning game which fairly bristled with close and unusual plays and got away without a kick? If you can recall such an incident, just dot it down in your notebook that you were present at a very, very unusual happening.

Do they cheer the umpire's name when he stops a foul tip with his shin or has a swift shoot bounced off his mask? Yes, they do—not. Any injury to the umpire usually gets a round of derisive laughter from the crowd. Generally, if he has been going bad, some leather lunged individual requests that he be killed or chloroformed. Of course there are many people in the stands who sympathize with the umpire. Their sympathy is usually silence. That isn't much balm to his injury or feelings.

Applause would sound so strange to an umpire's ears that he would probably become so thoroughly frightened he would jump the back fence.—Billy Evans in New York Tribune.

THE TELESCOPE.**Galilei's Rude Instrument the First Used in Astronomy.**

The first telescope was pointed toward the sky on Jan. 7, 1610, when Galilei first tried his rude instrument and was rewarded by discovering some of the moons of Jupiter. No great magnifying power was needed for this, as at least one of the moons is large enough to be seen by the naked eye did not the nearness of the brilliant planet prevent this. Lenses had been known for a long time and were at that time in common use by near sighted persons.

The name of the real discoverer of the telescope seems to be unknown, but the accepted story now is that two young sons of a Middlebury optician named Lippersey some time between 1605 and 1608, while playing with some lenses, happened to hold two of them at a distance from each other and were surprised and delighted to find that the weather vane on a neighboring tower seemed to come near them when looked at through the two lenses. In April, 1600, a little telescope made in Holland was offered for sale in Paris.

The next month Galilei, then a professor in the university at Padua, heard of this instrument and realized at once its importance in the study of astronomy. From the description of the Dutch instrument he had one

THE SAFETY OF "FRUIT-A-TIVES"

May Be Taken For Years

The Ideal Remedy For Young and Old

Nature's gifts do us good, if used judiciously. We eat bread from babyhood to old age without ever tiring of it. We drink water, year in and year out, with the greatest benefit to our health. So too, we eat fruit in season and are better for the change of diet. This is true, because such things are the natural foods and drink of mankind. It is for this reason that "Fruit-a-tives" may be used for years in correcting some ill of the body. As is well known, "Fruit-a-tives" is made of the juices of apples, oranges, figs and prunes.

Just as fresh fruit may be eaten at every meal, so "Fruit-a-tives" may be taken every night for 20 years or more with the greatest benefit. The absolute safety of "Fruit-a-tives" has been a great factor in its success. Those who suffered with chronic troubles such as Constipation, Dyspepsia, Rheumatism, etc., naturally took a number of boxes of "Fruit-a-tives".

As they became better, they found that instead of being compelled to increase the dose as in most medicines, they were decreasing it, and gradually taking fewer doses.

Soc. a box, 6 for \$2.50, or trial box, 25c. At dealers, or sent on receipt of price by Fruit-a-tives Limited, Ottawa.

A QUEEN OF FINANCE**HETTY GREEN IS ABOUT TO RETIRE FROM BUSINESS.**

The Richest and Shrewdest Woman Money-lender In the World Thinks It Is About Time to Settle Down to a Quiet Old Age—Some of Her Queer Characteristics—Was Grandfather's Secretary.

Mrs. Hetty Green, celebrated for years as the richest and shrewdest business woman in the world, will soon retire from active life and turn over the handling of the bulk of her immense fortune of \$60,000,000 to her daughter, Sylvia, now Mrs. Matthew Wilks. Mrs. Green is now 73 years old and for months past her health has been failing. Rarely does she appear at her office in the Chemical National Bank, New York, and when she does her feeble appearance indicates that her physical powers will soon be inadequate to the handling of her vast property interests. She lacks the snap and dash in managing her affairs that characterized her in the past, although her shrewdness is still on guard. One of the regrets of the aged woman, whose whole life has been devoted principally to the accumulation of dollars, is the non-inclination of her son, E. H. R. Green, to become as famous a financier as herself. Sylvia, the daughter, or to give her the name by marriage she bears, Mrs. Wilks, takes more after her mother in financial matters and hence will have control of the bulk of the fortune.

Hetty Green's name will long survive in the world of finance. She was born with a gold spoon in her mouth. Her father was Edward M. Robinson, a master whaler of New Bedford, and when he died in 1865 he left Hetty \$1,000,000 in her own right and \$9,000,000 in trust for his descendants. Hetty was much sought after in the

Four minute Records for the Edison Phonograph

When Mr. Edison invented the Amberol Records he invented the longest Record ever made for a sound-reproducing machine. But the Amberol Record is not only longer; it is better. It is made from a new composition which makes a more perfect reproduction of music or the voice than any known method.

invented the longest Record ever made for a sound-reproducing machine. But the Amberol Record is not only longer; it is better. It is made from a new composition which makes a more perfect reproduction of music or the voice than any known method.

An Amberol Record in an Edison Phonograph is the most perfect reproduction of a song or a piece of instrumental music that you have ever heard.

But do not accept our statement. Go and hear it. There is a dealer near you. Hear the Edison Phonograph and compare it with other instruments before you decide. We will leave it to your judgment as to whether you can buy anything for the price that will give you so much real, genuine fun and pleasure as the Edison Phonograph.

Edison Phonographs - \$16.50 to \$162.50
Edison Standard Records - .40
Edison Amberol Records (twice as long) .65
Edison Grand Opera Records .85

There are Edison dealers everywhere. Go to the nearest and hear the Edison Phonograph play both Edison Standard and Amberol Records. Get complete catalogs from your dealer or from us.

NATIONAL PHONOGRAPH COMPANY, 100 Lakeside Avenue, Orange, N. J., U.S.A.

for sale in Paris.

The next month Galilei, then a professor in the university at Padua, heard of this instrument and realized at once its importance in the study of astronomy. From the description of the Dutch instrument he had one made at once, and in August he astounded the people of Venice by showing them from the top of the campanile persons entering the doors of the church at Murano. This spyglass was less than two inches in diameter and magnified three times. From this crude instrument of Galilei to the monster telescopes forty inches in diameter of the present day is the development of only three centuries.—Argonaut.

born with a gold spoon in her mouth. Her father was Edward M. Robinson, a master whaler of New Bedford, and when he died in 1865 he left Hetty \$1,000,000 in her own right and \$9,000,000 in trust for his descendants. Hetty was much sought after in the matrimonial market. Finally she married Edward A. Green, a millionaire by virtue of his trading operations in the East Indies, and she carefully made an ante-nuptial agreement, under which her husband must support her and their children and must not touch a dollar of her money. She felt that she could attend to the handling of her money and she did attend to it, with a judgment, caution and self-reliance which have won the praise of the greatest financiers. And it was well for her that she did. Her husband eventually lost practically all his fortune, the direct avenue of loss being stock operations. His health failed him, so that for years he continued a chronic invalid in the Green homestead at Bellows Falls, Vt., where he finally died in 1902.

Soon after her marriage Mrs. Green's fortune was increased through the death of an aunt, who left her \$4,000,000, and with this and the \$1,000,000 left her by her father she has accumulated at least \$60,000,000.

Mrs. Green is noted for many things, chief among which are her parsimony and her litigious spirit. She dresses shabbily, or at least shabbily for a person of her means, and lives on homely fare. When her son was a lad he had to wear clothes which were patched and his mother always required him to sell the morning paper after it had been read. Hetty has a horror of paying taxes. She has never been on the tax roll of New York, because the assessors could never find her residence. To avoid taxation she moves from pillar to post, no matter at what inconvenience, and has often lived under assumed names the better to protect her wealth. Latterly she has been occupying a \$19 flat in Hoboken and probably thinks that this monthly rental is too high.

All her life Mrs. Green has been involved in one lawsuit or another, many of them being in connection with the estate left by her father. Her suits have extended from ocean to ocean and she has met and defeated more men, light-weights and heavy-weights, in physique and intellect, than all the living pugilists from Sullivan to Jeffries. She boasts that she is the only woman in the country who ever won a suit against the late C. P. Huntington. Of all the lawyers in the country, she hates most "Joe Choate," as she calls the ex-ambassador to England. Mr. Choate has figured prominently in litigation against her, and he has always managed to get a certain amount of rather unchivalrous humor out of her clothes. Being a woman, she has not forgotten this. Hetty was reared a Quaker and says that she was taught that to condone a crime is to share the responsibility of evil-doing. Hence her fighting spirit.

Hetty has been connected with financial matters since her babyhood. As soon as she had learned to read she reeled off stock reports to her grandfather and at the age of ten was acting as his confidential clerk, writing his letters and attending to some of his business. He was a man of many investments, and he told the child what was good and why. His poor health and bad eyesight, succeeded as they were by similar weaknesses on the part of her father, served to make her develop as quite a young girl into a practical business woman.

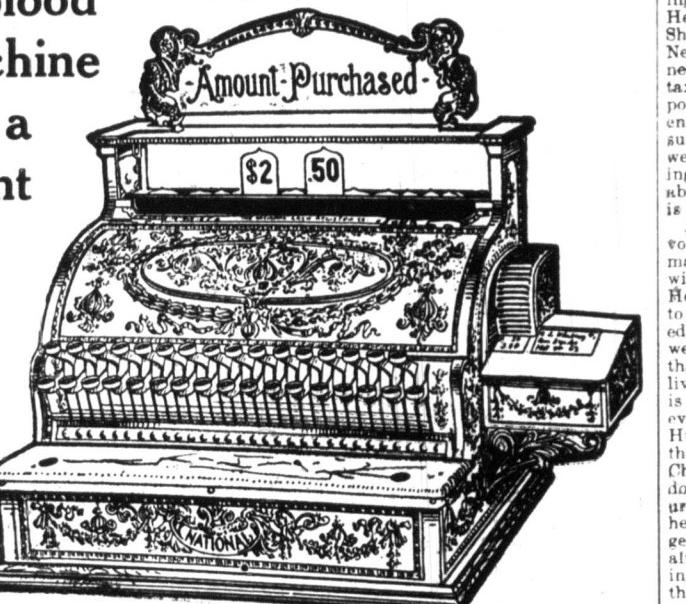

Didn't Follow Directions.
"Buttin seems rather sore on you old man."

"Yes; he annoyed me yesterday, and I told him to go and take a back seat."

"And he took affront, eh?"—Boston Transcript.

No legacy is so rich as honesty.—Shakespeare.

The man who neglects to put a National Cash Register at work in his store is losing money. He is trying to make flesh and blood do what a machine can do better—a principle that went out of date a hundred years ago. National Cash Registers prevent mistakes—tell you at a glance your exact financial position any minute of the day—are not a luxury—are made and sold only because they pay their way and save money.

This cut illustrates National No. 356, with Autographic Attachment, now reduced to \$170.

Total Adder and Tape Printer, with 29 Amount Keys registering from 1c. to \$20, and 4 Special Keys: Charge, Received on Account, Paid Out, and No Sale. Protects your money—your clerks—your business. Insures REAL protection to its owner.

Over 800,000 National Cash Registers have been sold to store-keepers. If this great army of business men cannot afford to be without National Cash Registers, how can You?

OUR GREAT GUARANTEE

We guarantee, without reserve, to sell a better Cash Register for less money than any other house in the world. We can prove it. Make us.

POINTERS ON COMETS

Interesting Facts That Were Unearthed by Bill Nye.

HIS STUDY OF SKY SCIENCE

The Humorist's Researches Shed a Flood of Brilliant Light Upon the Peculiar Traits of the "Astronomical Parodies on the Planets."

The famous American humorist, Bill Nye, wrote the following article on the traits of comets for the San Francisco Argonaut, in which it was published a number of years ago:

The comet is a kind of astronomical parody on the planet. Comets look some like planets, but they are thinner and do not hurt so hard when they hit anybody as a planet does. The comet was so called because it had hair on it, I believe, but of late years the baldheaded comet is giving just as good satisfaction everywhere.

The characteristic features of the comet are a nucleus, a nebulous light or coma and usually a luminous train or tail worn high. Sometimes several tails are observed on one comet, but this occurs only in flush times.

When I was young I used to think I would like to be a comet in the sky, up above the world so high, with nothing to do but loaf around and play with the little new laid planets and have a good time, but now I can see where I was wrong. Comets also have their troubles, their perihelions, their hyperbolae and their parabolas. A little over 300 years ago Tycho Brahe discovered that comets were extraneous to our atmosphere, and since then times have improved. I can see that trade is steadier and potatoes run less to tops than they did before.

Soon after that they discovered that comets all had more or less periodicity. Nobody knows how they get it. All the astronomers had been watching them day and night and didn't know when they were exposed, but there was no time to talk and argue over the question. There were 200 or 300 comets all down with it at once. It was an exciting time.

Comets sometimes live to a great age. This shows that the night air is not so injurious to the health as many people would have us believe. The great comet of 1680 is supposed to have been the one that was noticed about the time of Caesar's death, 44 B. C., and still when it appeared in Newton's time, 1,700 years after its first grand farewell tour, Ike said that it was very well preserved indeed and seemed to have retained all its faculties in good shape.

A late writer on astronomy said that the substance of the nebulosity and the tail is of almost inconceivable tenacity. He said this, and then death came to his relief.

Another writer says of the comet and its tail that "the curvature of the latter and the acceleration of the periodic time in the case of Encke's comet indicate their being affected by a resisting medium which has never been observed to have the slightest influence on the planetary periods."

I do not fully agree with the eminent authority, though he may be right. Much fear has been the result of the comet's appearance ever since the world began, and it is as good a thing to worry about as anything I know of. If we could get close to a comet without frightening it away we would find that we could walk through

DESERONTO.
June 18.—A severe electric storm passed over here on Saturday, but with not much damage. The spar on the steamer Burmah, unloading iron ore at the Deseronto iron works, had a piece taken out of it.

Frank Butzer, who had charge of the G. N. W. telegraph office, left on Saturday for Peterboro, to take a position. Miss Gladys Thompson has taken charge of the office now.

The steamer Aberdeen and consort, coal, in on Monday; Aberdeen took load of lumber for Oswego on Thursday; Porter and consort, in on Friday, with coal for Ma bank cement works; the Theo Yorges, light, in on Tuesday, cleared Wednesday with lumber for Oswego.

Mrs. James McLee and Mrs. Joseph Henderson, of Amherst Island spent the week with Mrs. McKee's sister, Mrs. David Thompson.

Word was received of the death of George Dennis, of Longford, formerly of Deseronto, son-in-law of Mr. and Mrs. John Cannon, who left for Longford to attend the funeral.

Cleo Knox, of Bank of Toronto, Galt, is spending the holidays with his parents, Mr. and Mrs. James Knox.

Robert Miller is in Montreal attending the funeral of his brother, Duncan Miller, who met death in the Herald disaster.

Miss Janet McLaughlin, of Toronto, is the guest of her aunt, Mrs. Alexander Smith.

Miss Janet Newton left this week for New York, where she will spend a few months with relatives.

O. K. Deare, of Bay of Quinte railway office staff, has returned, having had a holiday with friends at Syracuse and Rochester.

H. H. Elliott, Montreal bank has returned, after spending his holidays at Toronto and Lindsay.

H. Aldrich, of Montreal bank, has been sent to Kingston branch Mr. Walsh, of Kingston, taking his place.

A pretty wedding of last week was that of Miss Mary Theresa Wilson, eldest daughter of Mr. and Mrs. William Wilson, corner Dundas and Second streets, to Michael John Renihan, of Toronto, which took place Monday morning at nine o'clock in the church of St. De Paul, the ceremony being performed by Rev. Father T. J. Hartigan.

The bride was given away by her father. She wore a gown of Brussels net hand embroidered, over white taffeta. Orange blossoms held her long tulle veil in place, and she carried white carnations. She wore as a gift of the bridegroom a necklace of pearls, with pendant of pearls and peridot. Her only attendant was her sister, Miss Lizzie Wilson, wearing white mull eyelet embroidered with touches of pink. Pink picture hat and carrying pink carnations. She wore a pearl ring, the gift of the bridegroom James Owens, of Toronto, was best man, and the ushers were John Evans, of Buffalo, W. Kelly, of Chicago, cousins of the bride. Tokens were a pearl pin to groomsman and gold cuff links to ushers. The guests, over 100, and bridal party returned to the home of the bride for the wedding breakfast, and the usual toast and congratulations, after which Mr. and Mrs. Renihan left for a trip to Montreal and New York. The bride's travelling dress was of grey cloth, with white hat, with black plumes. Mr. and Mrs. Renihan will be home after the 15th of July, at 161 Stanley avenue, Toronto. The bride received a number of costly presents.

Mrs. M. Rhenihan, of Toronto, attended the wedding of her son on Monday.

Miss A. Powers, Miss M. Campbell, of Toronto; Mrs. F. McAlpine, of Belleville; Mr. and Mrs. D. J. Bow-

CASE OF BRONCHIAL CATARRH PROMPTLY RELIEVED BY PE-RU-NA.

MR. J.C. HERVUS PELLETIER

J. C. Hervus Pelletier, Dep't de l'Agriculture, Ottawa, Ont., writes:

"The Peruna is particularly efficacious in the cure of catarrhal affections of the lungs and bronchial tubes, and it is in consequence the remedy most appreciated here in Ottawa. Six bottles cured me this winter of bronchitis. I am completely restored and I owe thanks to the Peruna. I have recommended this remedy to a large number of my friends afflicted with the same trouble, and they have verified my good opinion of this valuable remedy."

CATARRH of the bronchial tubes often very quickly becomes catarrh of the lungs. Catarrh of the lungs makes the patient an easy victim to the germs that cause tuberculosis. Sound lungs protect themselves against disease germs.

Peruna has acquired a lasting reputation in relieving catarrh of the throat, bronchial tubes and lungs. This should prevent the tubercular bacilli from gaining any foothold in the lungs, and saves the patient from the inevitable result.

Mr. Wickliffe R. Smith, Editor of The Potlatch Herald, formerly Principal of the Schools at Cameron, Idaho, writes:

"For some time I suffered with catarrh of the throat and bronchial tubes. I tried many remedies, but could find nothing that would give me relief.

"Finally I tried Peruna. Three bottles cured me, made me sound and well. I believe it will do as much for others as it did for me. I shall be glad to recommend it to those suffering with catarrh."

CHEST NOTES.

Varying Sounds That May Be Heard Through the Stethoscope.

The doctor hears some curious noises when he places the stethoscope against your chest. When the lungs are in a healthy condition the medical gentleman hears a pleasant, breezy sound, soft in tone, as you draw in the breath and expel it. Should the instrument convey to his ear a gurgling or bubbling sound he makes a mental note of the fact that you are in what is known as the moist stage of bronchitis. In the dry stage of the same complaint the sound is a whistling, wheezy one.

One of the signs of pneumonia is the crackling note that comes through the stethoscope. It is not unlike the sound that can be heard when your finger and thumb have touched a sticky substance and you first place them together and then part them, holding

Bronchial Catarrh Unless Stopped Often Spreads To The Lungs, Causing Catarrh of Lungs.

So He Would.

A little country girl visited city relatives who dwelt in a flat. Her visit lasted two weeks, and all of the time they were warning her not to make so much noise, not to run across the street and not to waken the people in the adjoining flats. In fact, they were constantly curtailing her freedom. When she got home she told her papa she never wanted to go to the city again, and he said:

"You must have had a hard time of it. You do look hollow eyed."

"Well, papa," she said, "if you had folks hollerin' at you all the time you'd look hollow eyed too." —Pittsburg Dispatch.

signal much less has been the result of the comet's appearance ever since the world began, and it is as good a thing to worry about as anything I know of. If we could get close to a comet without frightening it away we would find that we could walk through it anywhere as we could through the glare of a torchlight procession. We should so live that we will not be ashamed to look a comet in the eye, however. Let us pay up our newspaper subscription and lead such lives that when the comet strikes we will be ready.

Some worry a good deal about the chances for a big comet to plow into the sun some dark, rainy night and thus bust up the whole universe. I wish that was all I had to worry about—the comet's crashing into the sun and knocking its daylights out. There is much in the great field of astronomy that is discouraging to the savant who hasn't the time or means to rummage through the heavens. At times I am almost hopeless and feel like saying to the great, yearnful, hungry world:

"Grope on forever. Do not ask me for another scientific fact. Find it out yourself. Hunt up your own new laid planets and let me have a rest. Never ask me again to sit up all night and take care of the newborn world while you lie in bed and rock not."

An Interruption.

Among the primary pupils enrolled in a Baltimore school is the son of a prominent business man of that city, says Harper's Magazine. One afternoon at close of school the youngster sought out his father in his office, to whom he said:

"Dad, I'm getting tired of school. I think I'll quit."

"Why," asked the astonished parent, "what's the matter, Tommy? I thought you were fond of going to school."

"So I am, dad," responded the youngster, suppressing a yawn, "but it breaks up the day so."

His Opening Break.

A congressman had returned to his constituency to deliver a carefully prepared address. The day arrived, and, loosening the first button of his Prince Albert, he uttered his carefully prepared prefatory remarks, and to this day he cannot understand the ripple of laughter which swept over his audience when he uttered his opening sentence, "Before I begin to speak to you I desire to say something." He said it.—Kansas City Star.

On the Way.

"I understand that you owe everything to your wife," said the tactless relative.

"No," answered Mr. Meekton, "but I will if I don't stop playing bridge with her and her mother."

Her Slip.

He—Do you think if I were to kiss you your dog would bite me? She—Well—er—he's never done it to any one before.

SUNBURN. BLISTERS, SORE FEET.

*Everybody now admits Zam-Buk best for these. Let it give YOU ease and comfort.

Druggists and Stores everywhere

Zam-Buk

presents.

Mrs. M. Rhenihan, of Toronto, attended the wedding of her son on Monday.

Miss A. Powers, Miss M. Campbell, of Toronto; Mrs. F. McAlpine, of Belleville; Mr. and Mrs. D. J. Bowman, of Kingston, attended the Wilson-Renihan wedding.

Mr. and Mrs. Fred Rhines, of Dexter, N. Y., is the guest of Mr. and Mrs. W. Wilson.

Lame Back.

To have a lame back or painful stitches, means disordered Kidneys, and the sooner you have the Kidneys and Bladder in a perfectly healthy condition, the sooner you will enjoy life. As far as we know there is only one remedy that is guaranteed to cure you, and that is Fig Pills. If they don't make you a strong, healthy person in two weeks your money will be refunded. 25¢ a box, at all leading drug stores. Hooper's Drug Store, special agent.

A CHINESE WEDDING.

As Solemn as a Funeral, With the Women All Weeping.

A Chinese marriage is all ceremony—no talk, no levity and much crying. The solemnity of a funeral prevails. After the exchange of presents the bride is dressed with much care in a red gown, brocade or silk if she can get it; her eyelashes are painted a deep black, and she wears a heavy red veil attached to a scarlet headdress, from which imitation pearls are pendent over the forehead.

A feast is spread upon a table, to which the blushing bride is led by five of her best female friends. They are seated at the table, but no one eats. The utmost silence prevails, when finally the mother leads off in a cry, the maids follow, and the bride echoes in the chorus. Then all the bridesmaids leave the table, and the disconsolate mother takes a seat beside the chair of state where the bride sits.

The bridegroom now enters, with four of his best men. The men pick up the throne on which the bride sits and, preceded by the bridegroom, form in procession and walk around the room or into an adjoining parlor, signifying that he is carrying her away to his own home. The guests then throw rice at the happy couple, a custom we have borrowed from the heathen.—St James' Gazette.

Too Lavish.

Mrs. Dobbs was trying to find out the likes and dislikes of her new boarder, and all she learned increased her satisfaction.

"Do you want pie for breakfast?" she asked.

"No, I thank you," said the new boarder, with a smile. "Pie for breakfast seems a little too much."

"That's just the way I look at it," said Mrs. Dobbs heartily. "I say pie for dinner is a necessity, and pie for supper gives a kind of finishing touch to the day, but pie for breakfast is what I call putting on airs."—Youth's Companion.

The Usual Sequel.

When they reached Montreal on their elopement Chicago seemed far, far away, and they were both homesick.

"I will just telegraph the letter 'P' to father," said the beautiful bride. "That will mean forgiveness."

"Better make it two 'P's," advised the young bridegroom.

"Gracious, dear! And what will two 'P's mean?"

"Why, forgiveness and funds."—Chicago News.

One of the signs of pneumonia is the crackling note that comes through the stethoscope. It is not unlike the sound that can be heard when your finger and thumb have touched a sticky substance and you first place them together and then part them, holding them close to your ear.

Doctors occasionally hear a dripping sound, and that indicates that air and water have got into some part of the chest where they have no right to be. Blow across a bottle, and you will produce a sound which is actually to be heard in your chest. It is caused in the same way—that is, by air passing over a cavity.

Filipino Buglers.

"Speaking of buglers," says Boatman Jurashka in his article, "Captured by Filipinos," in Wide World Magazine, "It astonished me to find that the insurgents had so many buglers and that many of them were of the best. They knew all our army calls, although they did not know their significance. I was often asked the meaning of various calls and was careful to give them any but the proper one. One insurgent colonel asked me what call was sounded as the retreat from the charge. I told him that we had no such call, but that, the charge once sounded, American soldiers and sailors went through or never came back. He was very much interested and with good reason, as he had just escaped from the attack of our men at Iloilo and could well believe it. He said that charging was unfair—that both sides should simply snipe at each other."

Children City FOR FLETCHER'S CASTORIA

patch.

Not Ambiguous at All.

In one of England's elections, a candidate for parliament, the late Lord Bath, called attention to himself by means of a donkey, over whose back two panniers were slung bearing a ribbon band on which was printed "Vote For Papa." It must be added, however, that in each pannier stood one of Lord Bath's daughters.

Good Reason.

"Here's the doctor again, miss. Don't you think he comes more often than he needs to?"

"It all depends. He may be very poor, Marie."—Frou-Frou.

Think not that thy word and thine alone must be right.—Sophocles.

Asaya-Neurall

THE NEW REMEDY FOR

Nervous Exhaustion

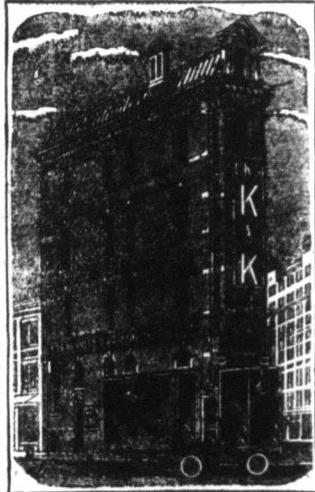

Headache, Insomnia and Neuralgia are generally the result of exhausted nerve centres. The true remedy is not a paralyzing drug, but Food, Rest and nerve repair. "ASAYA-NEURALL" is and makes possible this cure. It feeds the nerves, induces sleep, quickens the appetite and digestion; freedom from pains and buoyancy of spirits result. \$1.50 per bottle. Obtain from the local agent.

MEN—WE CAN CURE YOU

FINEST MEDICAL INSTITUTE IN AMERICA

OWNED AND OCCUPIED BY DRs. K. & K.

YOUNG OR MIDDLE-AGED MEN who need the services of expert specialists why waste your money in treating with doctors you know nothing of, why waste your money with worthless electric belts or drug store nostrums, when you can get guaranteed, reliable, successful treatment from these Master Specialists. Drs. K. & K. have treated patients throughout Canada for over 20 years and are responsible legally. They accept only curable cases and should your case prove incurable it is good for you to come to us. If you are unable to call at our office for a personal examination we will send a Question List for you to fill up from which we can diagnose your case and tell you whether you are curable or not. Then we will prescribe specific remedies for your individual case which you can take at home. We have no cure-all remedy that we send to everybody alike as most specialists do, but we prescribe the remedies required for each individual case to complete a cure. That's one of the secrets of our wonderful success when others fail. Send for our Free Booklet on Diseases of Men [Illustrated].

CURES GUARANTEED OR NO PAY

We Guarantee to Cure Nervous Debility, Blood Diseases, Varicose Veins, Kidney, Bladder and Urinary Diseases. CONSULTATION FREE. If unable to call, write for a Question Blank for Home Treatment.

Write for our private address.

SETTLERS LOST EVERYTHING

Disastrous Results of Forest Fires Near Fort William.

A despatch from Port Arthur says: Damage to standing timber that cannot be estimated with any degree of accuracy, but which will reach into the hundreds of thousands, dozens of settlers rendered homeless, with their personal effects destroyed and their fields scorched so that there is little likelihood of any crops being raised thereon this season, is in brief to date the result of the forest fires surrounding Port Arthur in every direction. Telephone messages received on Wednesday night from Hymers and Kakabeka Falls are that there is no sign of the fires abating. As the message was received in Port Arthur a light rain had commenced to fall, but there was no sign of any at Kakabeka, where the families of every settlement for miles around have congregated for shelter and protection. Every family in the district

has buried its valuables in the ground, and many have lost everything else, while others have so far saved their property only by ceaseless efforts. The principal sufferers are in Conmee, O'Connor and Papiconge townships.

Death has now been added to the destruction by forest fires which have been devastating this district for several days. Mrs. Christopher Evans of O'Connor township, was smothered in the burning of her home while her husband was away with other settlers fighting an advance of flames, believing his own place to be in no immediate danger. Fred. and M. Winslow, brothers, who lost heavily by the destruction of logs in the vicinity of Kakabeka, have not reported to any of the villages for a couple of days and while there is no certainty they have been lost it is feared to have been the case.

RUSH TO B. C. GOLD FIELDS

Men at Stewart City Threw Away Their Tools and Joined the Rush.

A despatch from Vancouver, B.C., says: Arrivals from Stewart City confirm the stories of a big strike on Bitter Creek, seventeen miles from there. An hour or so after it got out Stewart City was practically deserted. The stampede was the most frenzied in the history of the northland. Waiters dropped their trays, builders their trowels and started on the journey with whatever they could grab hold of in the way of outfit. The gold reef has been traced twenty miles, and that was not the end of it. The discoverer describes it as a range, not a mountain, of gold. Ore free-milling samples went \$20 to \$59 a

ore in sight to keep 1,000 stamp mills going for a quarter of a century.

A few sections of land in Matsqui, a few miles east of the Fraser River, on which mine sale rights are reserved, have been discovered, and a rush is being made by residents of the district to apply for properties, where valuable traces of oil have already been found. On Tuesday eight Abbotsford men filed their papers at the mining recorder's office. Since a boring machine was started at work at Matsqui the excitement in regard to the oil deposits has been daily increasing.

THREE PERSONS KILLED.

Buggy Struck by Wabash Express at an Aylmer Crossing.

A despatch from St. Thomas says: A sad accident occurred on Sunday morning at the Wabash level crossing in Aylmer, resulting in the death of three people, Mr. Thomas F. Hare and his wife, Hannah M., and her sister, Miss Annie E. Scott of Ottawa. It transpired that all three had been to church and were driving home to Mr. Hare's farm, about a mile and a quarter north of the town, when No. 3 Wabash express dashed into them as they attempted to cross the track. Mr. and Mrs. Hare were killed instantly and Miss Scott died three hours later from injuries sustained. About two hundred yards east of the crossing is a curve and none of the occupants of the buggy could see

PREACHERS FOUGHT DUEL.

Attacked One Another with Knives in Kentucky Church.

A despatch from Louisville, Ky., says: An indictment was returned on Thursday, but not made public until Sunday, charging Rev. Isaac Perry with the murder of Rev. Robert Vanover. The two ministers, both well-known mountain preachers, had been holding revival meetings in Whitely county, and quarreled over some charges which had been laid against Vanover. The trouble reached its height during a service in the Rock Creek Baptist Church a week ago, and Vanover and Perry, armed with knives, fought a duel in the building while the people, in a panic, fled. Vanover's throat was cut from ear to ear and he died in a short time. Perry and his brother Blaine are in

Doomed to Suffering

RESCUED BY "FRUIT-A-TIVES"

CHARLES BARRETT, Esq.

Harbor au Bouche, March 24, 1909.
"I suffered terribly from Biliousness and Dyspepsia for fifteen years, was treated by physicians and took many remedies but got no relief. Then I took "Fruit-a-tives", and this medicine completely cured me when everything else failed. To all sufferers from Indigestion, Biliousness and Constipation, I strongly advise them to try this fruit medicine". Charles Barrett.

50c a box, 6 for \$2.50—or trial box, 25c. At all dealers or from Fruit-a-tives Limited, Ottawa.

CIRCUS TRAIN WRECKED.

The Wild Beasts are Loose and Inhabitants are Scared.

A despatch from Ebensburg, Pa., says: The circus train composed of fifteen cars of the Frank A. Robins shows was wrecked one mile from here early on Thursday on the Cambria and Cresson branch of the Pennsylvania Railroad. Two lions, an elephant, one leopard, one hyena, one jaguar and an ibex are reported to be at large as a result of the derailment. Ten circus employees were injured. The entire country for miles around is in a state of terror. Many of the farmers and their families refuse to leave their homes and take up the search for the liberated menagerie beasts.

THE PORCUPINE COUNTRY.

Work of Mapping Proceeds Rapidly
—Good Road Being Built.

A despatch from Toronto says: Geological maps of the Porcupine district will shortly be issued by the Department of Lands, Forests and Mines as a result of the trip of Professor W. G. Miller, Provincial Geologist, and his party a month ago. Prof. Miller has ten men in the gold area working hard, covering about ten townships. The mapping is in charge of Mr. A. G. Burrows of the mines branch, who laid out the South Lorraine and Gowganda; he is assisted by Messrs. C. W. Knight, Assistant Geologist, and W. R. Rogers, Topographer. The work will likely be concluded in about a week.

HOW THIN FOLKS CAN GET FLESHY

New Accidental Discovery Gives Startling Results—Puts Flesh on Thin People and Rounds Out Imperfect Figures.

Simple Prescription Given.

For women—and men too, for that matter—who can never appear stylish with anything they wear, because of abnormal thinness and angularity, this remarkable prescription is destined to solve the problem. As a beauty maker for the figure it is simply wonderful while it adds brightness to the eyes, and color to the cheeks and lips. It

has particular distinct hnt

COUNTRY PRODUCE.

Butter—Creamery prints, 22c; Separator prints, 20c; Dairy prints (choice), 18c to 19c; Inferior tubs, 1cc.

Eggs—19c per dozen in case lots. Cheese—New large cheese, 11½c and *twins at 12c per pound. Old cheese, 12½c to 13c.

Beans—\$2.10 to \$2.20 per bushel for prunes and \$2.10 to \$2.20 for

tempted to cross the track. Mr. and Mrs. Hare were killed instantly and Miss Scott died three hours later from injuries sustained. About two hundred yards east of the crossing is a curve and none of the occupants of the buggy could see the train. Several people nearby, however, shouted to them that the train was coming, but they tried to cross ahead of it, with the painful result that all three lost their lives. They were each about seventy years of age, and were well known and highly respected in the district.

SOLDIERS FOUGHT FIRE.

Bush Near the Camp at Petawawa Threatened Damage.

A despatch from Military Camp, Petawawa, Ont., says: About 9 o'clock on Thursday morning the bush near the camp of the Toronto company of Engineers caught fire, and as a high wind was blowing, the camp was in danger of being wiped out. The men were out of camp at work at the time. Capt. S. P. Biggs ordered the fire call sounded, and the men dropped their tools and came into camp at the double. Headed by Captain Biggs, they caught up axes, spades and blankets and speedily had the fire out.

INDUSTRIAL ACCIDENTS.

One Hundred and Thirty-three Persons Killed in May.

A despatch from Ottawa says: The death through accidents among employees in Canadian industries during May numbered 133. In addition, 243 individual work people suffered serious injuries. In the railway service 25 employees were killed during the month and 39 injured. The total number of trade disputes reported in existence during May was 21, an increase of five as compared with the preceding month. About 325 firms and 2,223 employees were affected by new disputes. The loss of time to employees through strikes was approximately 71,830 working days, as compared with 96,350 in May of last year.

Revolution is said to be spreading in Nicaragua.

Church a week ago, and Vanover and Perry, armed with knives, fought a duel in the building while the people, in a panic, fled. Vanover's throat was cut from ear to ear and he died in a short time. Perry and his brother Blaine are in jail at Williamsburg.

FOURTEEN WERE KILLED.

Collision of Two Trains at Ville Preux, France.

A despatch from Ville Preux, France, says: The Granville express crashed into the rear of a local train standing at the station here on Saturday. Both trains were wrecked and the wreckage caught fire. Fourteen bodies have been taken from the wreckage.

BRITAIN'S INHERITANCE TAX

Will be \$128,000,000 for Present Fiscal Year.

A despatch from London says: Chancellor of the Exchequer Lloyd-George estimates that the receipts from the inheritance tax for the financial year ending July 1 will amount to \$128,000,000. The delayed income tax collected in April and May may amount to over \$100,000,000.

ANOTHER RECORD BROKEN.

Royal Edward Clips Two Hours Off Atlantic Record.

A despatch from Quebec says: Two hours have been clipped from the Canadian trans-Atlantic record. The "Royal Edward," the new triple screw turbine steamer of the Canadian Northern's fleet, left Bristol at 8 p.m. Thursday last and docked here on Wednesday at 3:30 p.m., beating the best previous performance of any Canadian steamer by two hours.

MINER CRUSHED TO DEATH.

Fatality in International Mine at Coleman.

A despatch from Lethbridge says: Joseph Hemenack was killed and William Kelly was fatally injured by being crushed by a fall of coal from the head wall of the seam in the International Coal & Coke Company mine at Coleman on Monday morning.

cause of abnormal thinness and angularity, this remarkable prescription is destined to solve the problem. As a beauty maker for the figure it is simply wonderful while it adds brightness to the eyes, and color to the cheeks and lips. It requires no particular dieting, but acts as an aid to nature by its peculiar action on the nerves and blood supply. The blood and nerves distribute over the body all the nourishment or flesh building elements obtained from the food. The trouble with thin people has always been that they do not absorb or retain enough of the fleshy matter to make them gain in weight even to a normal extent; but this new discovery of blending certain harmless drugs is a revelation to science, and hundreds have gained from ten to forty pounds in a few weeks. There is no danger of becoming too fat. When you get the right weight then stop using.

The general health and strength is greatly improved in anyone from the age of sixteen to sixty. Women soon get plump, with well rounded arms and full bust, and men become straight, strong-looking and healthy.

In a half pint bottle get three ounces of essence of pepsin and three ounces syrup of rhubarb. Then add one ounce compound essence cardiol, shake and let stand two hours. Then add one ounce tincture cardamome compound (not cardamom). Take a teaspoonful before and after meals, and weigh before beginning.

MONTREAL MARKETS.

Montreal, June 21.—Corn—American No. 2 yellow, 60c to 67c; No. 3 yellow, 64c to 65c; do., No. 2 mixed, 65c to 66c; do., No. 3, 63c to 64c. Oats—No. 2 Canadian western, 36c to 36½c; No. 3, 35c to 35½c; Ontario No. 2 white, 34c; do., No. 3 white, 33c; do., No. 4 white, 32s. Barley—No. 3, 56½c; do., No. 4, 55c; feed barley, 54c.

Flour—Manitoba spring wheat patents, firsts, 83.40, seconds, 84.90; winter wheat patents, 85; Manitoba strong bakers', \$4.70; straight rollers, \$4.75, in bags \$3.10 to \$3.20; extras, \$1.90 to \$2.

Eggs—Selected stock, 21c to 22c, and straight receipts, 18c per dozen.

Cheese—11c to 11½c for westerns and 10½c to 10¾c for easterns.

Butter—23c to 23½c per lb.

UNITED STATES MARKETS.

Buffalo, June 21.—Spring wheat—Steady; No. 1 Northern, carloads store, \$1.08½; Winter, steady.

Corn—Higher; No. 3 yellow, 62½c; No. 4 yellow, 61c; No. 3 corn, 61c; No. 4 corn, 59½c. Oats—Strong;

No. 2 white, 41½c; No. 3 white, 39½c; No. 4 white, 38½c. Barley—Feed to malting, 61½ to 67c.

Minneapolis, June 21.—Wheat—July, 81.03%; September, 92%; December, 90%. Cash—No. 1 hard, \$1.08%; No. 2 Northern, \$1.08½ to \$1.05%; No. 3 Northern, \$1.01½ to \$1.03%. Bran—\$16 to \$16.25. Flour—First patents, 85 to 85.20; second patents, 84.80 to 85; first clears, \$3.85 to \$3.95; second clears, \$2.60 to \$2.90.

LIVE STOCK MARKETS.

Montreal, June 21.—Prime beefeves sold at from 7c to 7½c per lb.; pretty good animals from 5½c to 6½c; milkmen's strippers, 4½c to 5½c; and the common stock at 3½c to 4½c per lb. Good large milch cows ranged from \$80 to \$80 each, while ordinary cows sold at from \$30 to \$45 each. Calves, \$3 to \$10 each, sheep, 4½c to 5c per lb., lambs \$4 to \$6 each. Good lots of

cause of abnormal thinness and angularity, this remarkable prescription is destined to solve the problem.

STRATHCONA'S GENEROSITY.

Gives Large Sum to Assist Winnipeg Fair.

A despatch from Winnipeg says: The Winnipeg Industrial Exhibition Association on Friday received the largest individual money gift in its history from Lord Strathcona, though the amount has been withheld by the directors at the desire of the donor. It is understood, however, that the gift marks a unique record of its kind. Only a few months ago Portage la Prairie Fair was remembered by Canada's high commissioner to the extent of \$2,000.

AN ITALIAN MURDERED.

Raphael Domenelle Shot at Parry Sound by Jos. Pisani.

A despatch from Parry Sound says: Raphael Domenelle was shot and killed at Foote's Bay, Ont., by Jos. Pisani. Pisani is still at large. Provincial Constable Connor left Parry Sound this morning to arrest Pisani. Up to the present nothing further has been heard. Both men are Italians.

RICH WESTERN SCHOOLS.

Sale of Their Land Brings Big Prices.

A despatch from Estevan, Sask., says: At the sale of school lands completed on Wednesday two hundred and forty-five parcels were sold. Prices ranged from \$7 an acre to \$30, and competition was keen, the net proceeds being over half a million dollars.

Orders have been issued at St. Petersburg to adopt milder measures in dealing with the Jews.

EARL GREY BOOSTS CANADA

Tells People in Bristol to Go and See and They Will Stay.

A despatch from London says: At Bristol, on his arrival, on Thursday, Earl Grey was immediately surrounded by a band of eager pressmen, but held his own against the fire of questions with frank good humor and subtle avoidance of controversial topics. "We had a delightful voyage. The development of Canada is going as strong as it can go. The maritime provinces are as good for immigrations as the Northwest. Prospects were never brighter," he said. "Why don't you come and see the country? You cannot understand it till

you see it and visit it. When you have visited it once you won't be happy until you have seen it a dozen times." Earl Grey added that Canadians were pleased with the present class of immigration.

Asked about the imperial spirit in Canada, he said: "Imperial spirit is all right in Canada," he answered. "Why they are more imperial than you are. I wish you would come to Toronto to see the Empire Day celebration as I saw it. Then you would know what I mean. The people of Canada believe in themselves and their future as a part of the empire."

CROPS IN THE FAR WEST

Has Been Plenty of Rain and Little Damage From Recent Frost.

A despatch from Winnipeg says: The Free Press monthly crop report, issued on Thursday, based on information from about 250 points, says the damp, cold weather which prevailed during the latter part of May and the early part of June, while checking the upward growth of the crop, caused the roots to develop and the plants to stool, the result being that with the arrival of warm weather rapid growth has taken place, and now the general outlook is regarded to be as good as last year. The common cry of "more rain," which was being heard, chiefly from Alberta, has been dispelled by heavy showers within the last few days, and now there seems to be no reason to fear that the crop will be less than last year. Heavy June frosts have done some damage in Arcola, Langford and Napinka districts. Damage from wind by drifting is also reported from Pierston and Hal-

brite. In Carroll River Valley the cut-worm has been doing some damage, but the prospects are still bright. Barley-seeding appears to be practically completed, and rapid growth is taking place. In some of the damaged wheat districts the fields have been ploughed up and sown to this crop.

DETERMINED SUICIDE.

Postmaster at Fassifern, Ont., Cuts His Throat.

A despatch from Alexandria, Ont., says: Postmaster E. A. Newman of Fassifern cut his throat on Friday morning at 2 o'clock with a razor, and expired immediately. Deceased was 37 years of age, married, and removed from Montreal to Fassifern about three years ago, where he purchased a store. He had been drinking heavily.

Canadian Appreciation

Langham Hotel, London.

Gentlemen,—I wish to express my appreciation of the 38 h.p. Daimler which you have delivered to me. Before shipping the car to Canada I made a three weeks' trial of it, covering some 1,200 miles. The car ran perfectly, and I never had the slightest trouble of any kind, and I think it quite lives up to the many claims you make for it. The silence, smoothness of running, and power of acceleration on hills is really remarkable.

My petrol consumption was 16 miles to the gallon, including a great deal of driving in traffic. The tyres show no appreciable signs of wear, and I think it will prove light on tyres.

I am really delighted with the car.—Yours sincerely,

(Signed) C. A. BOONE, of Toronto, Canada.

GREAT FLOODS IN EUROPE

Terrible Havoc Wrought in Austria and the Balkans.

A despatch from Budapest says: Nearly 300 persons were killed, and several villages annihilated by a cloudburst Friday in Krasso-szony, County of Hungary, bordering on Transylvania, Rumania and Servia. The capital of the county, which is mainly peopled by Rumanians, is Lugos. It is expected that the death roll will be greatly increased when communication, which has been almost completely cut off, is restored. Bridges, telegraph and telephone wires in the district have been destroyed, and it is feared that many of the survivors of the flood will die of starvation or exposure before it is possible to send assistance.

DAMAGE IN SWITZERLAND.

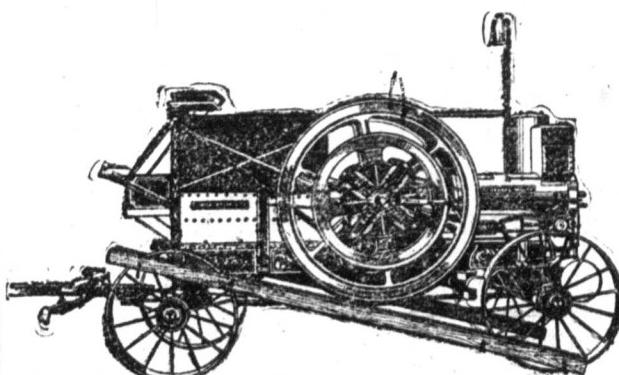

A despatch from Berne, Switzerland, say: The floods in Switzerland, caused by continued rains, particularly in the eastern and central districts, have proved to be the most disastrous in the past sixty years. Twenty lives have been lost in the swollen waters. Many bridges, constructed at great expense, have been either carried away or seriously damaged. Prop-

erty losses aggregating \$2,500,000 have already been reported.

20,000 HOMELESS.

A despatch from Vienna says: Southeastern Europe is flood-swept, and reports received on Thursday indicate that the death list is between 800 and 1,000. Whole villages have been wiped out, and fertile valleys to-day are lakes. The property damage cannot be definitely estimated, but meagre advices already at hand show that it will surely be in excess of \$2,500,000. The situation has not been equalled in many years. Austria, the Balkans and Armenia have suffered heavily. Relief work is being pushed as well as possible. With the roads wiped out, railroads tied up, and wire communication in many sections at a standstill, the difficulties of speedy relief appear insurmountable. Rains are reported generally, and the floods continue. With every dispatch the horror of the situation increases. In the entire region affected it is believed that more than 20,000 people are homeless.

FAIRBANKS-MORSE GASOLINE ENGINES

Horizontal Screen Tank Outfit.

Sizes 10, 12, 15, 20, 25 Horse-Power

Portable Horizontal "Screen Tank" Outfit

The cut illustrates another Fairbanks Morse outfit developed for the farm trade, especially suited for Threshing, Sawing Wood and General Farm Power.

The cooling device consists of a fine screen placed over the storage tank slanting toward each side as shown. The hot water from the engine trickles slowly down the screens, and in this way is exposed to the cooling effect of the air. This arrangement provides a highly efficient outfit, that for steady, economical running cannot be beaten.

Each outfit is complete with necessary accessories ready to run.

FORCING YOURSELF TO TAKE FOOD

The Tortures of Indigestion Banished by the Tonic Powers of Dr. Williams' Pink Pills.

Victims of indigestion have small choice between two evils—on the one hand a starvation diet, which means great weakness and depression of spirits, and on the other hand forcing themselves to take nourishment in spite of the acute suffering inflicted by each meal.

In the search for a cure they find common medicines upset the stomach and render the food more difficult to digest. Laxatives are violent and weakening, and so-called "pre-digested foods" merely evade the cause of the trouble and the stomach steadily grows weaker.

The common sense way of curing indigestion is the Dr. Williams' way—the making of new, rich blood by Dr. Williams' Pink Pills that gives tone to the weakened system and invigorates the distressed digestive organs. Dr. Williams' Pink Pills have cured thousands of the worst cases of indigestion through their simple tonic treatment and one excellent example of these cures is the case of Miss M. Y. C. Roberge, Sorel, Que., who says: "For upwards of nine years I suffered almost continuously the tortures of indigestion. At times I had no appetite; at others there was a craving for food, but whatever I took caused me the greatest pangs. As the result of the trouble I suffered from violent headaches, and I grew pale and weak. I tried many different medicines; some gave me a little relief, but none gave me any permanent benefit until I began using Dr. Williams' Pink Pills. I had only taken these a few weeks when I found such help as I had not found before. The pains after eating gradually disappeared, my appetite grew better, and after using the Pills for a couple of months I found myself completely cured, and have not since had a twinge of the trouble. I gratefully recommend Dr. Williams' Pink Pills to all who suffer from any form of indigestion."

Through their action on the blood Dr. Williams' Pink Pills cure such troubles as anaemia, indigestion, sick headaches, rheumatism and all forms of nervous troubles such as neuralgia, St. Vitus dance, and partial paralysis. These Pills are especially valuable to growing girls and women and cure the headaches, sideaches and other pains known only to them. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

ENGLAND GROWS RICHER.

Trade, Income, Ships, All Increased in Edward's Reign.

The story of England's material progress during King Edward's brief reign is told in colossal figures. The imports of the Kingdom, which, at the close of last century stood at \$2,600,000,000, last

THE MYSTERY CLEARED UP.

OR, THE HERITAGE OF MADAME VALTA.

CHAPTER VII.—(Cont'd)

This exclamation escaped Maxime unguardedly.

"You know the man then? Would it please you to tell me where you have seen him?"

"I saw him dining with you yesterday in a restaurant,—Avenue de l'Opera."

"How do you know that the man of whom I speak is the one who was dining with me?"

"I know it because I followed you."

"You were acting the counter-police as it appears."

"It is admissible when one is dealing with a spy."

"Maxime!" exclaimed the banker, with a severe glance at his nephew.

"Oh, let monsieur speak," continued the colonel, unmoved. "His estimate touches me very little, and I have several questions to ask him."

"You wish to know where I followed you? I was in the orchestra of the opera when you entered the box of that woman. I rode in a carriage behind the hack that took you to Rue de Suffroy. I established myself in a house opposite the one you entered, and remained there until you took flight, and even a little later."

"My best compliment, monsieur. The Nihilists have in you a valuable auxiliary."

"I am not with the Nihilists, you know very well," retorted Maxime, bluntly.

"You say so, and I wish to believe it," replied Borisoff, "but I am driven to think the contrary, for if you passed a portion of the night in watching me, it was not for the purpose of seconding me in my conflict with these people. May I venture to ask what is now your opinion of M. de Carnoel?"

"I can answer without the least embarrassment. M. de Carnoel is evidently the friend of the woman who delivered him."

"You admit also that the woman belongs to the sect which steals, burns, and assassinates."

"I admit it the more readily, as I am in possession of the proof."

"And this proof, would you furnish me with it?"

"To what purpose? You are about to leave France. The plots which are being carried on in Paris do not concern you. Besides, my conviction rests on facts which are personal to myself. As for M. de Carnoel, he has been delivered by a vile creature assisted by a false police agent, and has taken refuge in an asylum prepared for him by this pretty couple. It follows that he makes a part of the band."

"You are wonderfully well informed," said the colonel, smiling sarcastically. "But I did not come to see your uncle for the purpose of entertaining him with the no-

and there is little probability that your ci-devant secretary will show himself there. If his accomplices, less prudent, should ever fall into my power, I shall not fail to transmit to you whatever may come to light through these wretches concerning the theft. And in any event I carry with me the satisfaction of having edified you concerning a young man who has sought to bring trouble into your family. Should he renew his audacious attempt, I leave you the means of confounding him." M. Borisoff had placed the notes on the table and handed the letters to M. Dorgères.

"There remains nothing now, gentlemen, but to take leave of you. My steward will come to-day to withdraw my funds. Adieu, monsieur. Present my best respects to Mlle. Dorgères, and believe in my best wishes."

Before leaving, he turned toward Maxime and tossed him a bit of advice:

"Believe me, monsieur, you would do well to abstain from pursuing the rescuers of M. de Carnoel. They would kill you."

With these words he disappeared just as the valet Joseph entered and said:

"Mademoiselle sends me to say to M. Dorgères that she is waiting breakfast for him."

"Very well. Say that I am coming."

The valet went out and the banker was left alone with Maxime, who was much less agitated than his uncle.

"May the devil take this Russian with his revelations and his resolutions," he said; "I have a mind to run after him and return these cursed bank-notes."

"Why?" asked the nephew. "Do you suppose he has taken them from his own property for the pleasure of dishonoring M. de Carnoel? I can scarcely believe it."

"Then you think he spoke the truth?"

"Yes; thus far that the fifty thousand francs were found in the pocket of your former secretary. It remains to be seen who wrote the letter."

"Do you doubt that it was this unfortunate young man?"

"Not exactly, though that would upset the ideas I had conceived of his character. But between the act of stealing money and that of which we believe him guilty, the difference is small enough. To associate oneself with rascals who break safes under the pretext of politics is more than enough to disonor a man. Let me go on with the story which the colonel interrupted. I placed in my pocket a bracelet that was found on the hand, and kept it as a means of discovering the admirable person who had abandoned it to the claws of your safe. One evening, after

prefecture of police; but I wish to know finally where I stand in regard to your former secretary, and I know some one who will introduce me into the house in which he is hiding."

"Diable! it would be a hazardous expedition. Remember the words of the colonel: 'Take care, these people would kill you.'"

"I am not afraid of them."

"You will be always the same—going straight on, doubting and suspecting nothing. They have just blown up the Winter Palace; to murder you would be a much smaller matter."

At this moment Jules Vignory entered. He had an anxious appearance, and seemed surprised at seeing Maxime.

"Monsieur," he said, "I have just been notified that Col. Borisoff will withdraw his funds at three o'clock. May I settle his account?"

"Yes. I have just seen the colonel. But I wish to speak with you. Why did you not tell me of the first attempt at theft? Oh, do not assume the astonished! I know all. Maxime has just given me the history of the hand."

"He ought to have done so sooner," replied the cashier; "it was he who urged me to silence."

Maxime said nothing, but he knitted his brow. He found Vignory over-prompt to vindicate himself at the expense of a friend.

"I know that, and I am not displeased with you beyond measure, though it seems to me that your situation imposed upon you duties to which you have been wanting. But we will leave the past, and be kind enough to examine these packages of bank-notes," added the banker, pointing to the files which were still spread-out on the table.

Vignory took them up and began counting them over.

"There are fifty," he said.

"That is not what I ask. Where do you think they came from?"

"From my safe, undoubtedly. I recognize the way the pin is stuck in; a little more to the right and a little lower down than the packages made at the Bank of France."

"Very well. My rogue of a secretary can no longer maintain that he has stolen them."

"What! it was—"

"We hold in our hands the sum that was taken from me, and it rests with me to have this Carnoel arrested."

"He is in Paris!" exclaimed Vignory.

"Yes, and I have in my hand the proof of his infamy. Would you believe that he has had the audacity to assert that this money was sent to him by a debtor of his father! He had a letter written. Read it, and tell me what you think."

Vignory turned pale and took the letter with a hand that trembled visibly.

"The imposture is evident," he said, after having glanced at it; "it is even very clumsily done; this letter must have been dictated by M. de Carnoel."

"Dictated to whom?" asked Maxime, abruptly.

"To one of his friends, no doubt. I do not know the handwriting."

"But intimate as you were, you must know the friends of Robert de Carnoel."

"Friends—he had few," stammered Vignory. "A few college chums, and those he saw very rarely."

The story of England's material progress during King Edward's brief reign is told in colossal figures. The imports of the Kingdom, which, at the close of last century stood at \$2,600,000,000, last year totalled \$3,100,000,000, or an increase of 20 per cent. Exports in the same time gained \$430,000,000, or nearly thirty per cent., and the total foreign trade of the kingdom increased from \$4,380,000,000 to \$5,450,000,000, or twenty-five per cent. Comparing the April just passed with the April of ten years ago, that month this year shows a total trade of \$530,000,000, compared with \$350,000,000 in the same month of the last year of the last century, an increase of 50 per cent.

There are 18,400,000 tons of shipping registered in the United Kingdom. Ten years ago there were only 14,000,000. The increase in steam tonnage has been even greater than that, but sailing vessels have decreased.

Perhaps the most easily obtained test of trade within the country is the bank clearings, and the figures these present are almost too large to be grasped. The clearings last year were 68 billion (thousand millions) dollars. It would take a thousand years to count that sum, counting two a second. This was an increase during King Edward's reign of 23 billion dollars.

The assessment of income from trade, professions, etc., excluding those who earn \$800 a year or less, is now \$5,500,000,000, an increase in the nine years of 1,160 million. This income is received by a little over a million people.

AN EXCELLENT REMEDY FOR ALL BABIES.

Baby's Own Tablets are an excellent remedy for babies of all ages. They cure all stomach and bowel troubles; make teething easy; dispel worms; and make baby fat, good-natured and healthy. They are sold under the guarantee of a Government analyst to contain absolutely no opiate or narcotic, and thus they can be given to the new born baby with perfect safety. Mrs. Benoit Martin, Avignon, Que., writes: "Baby's Own Tablets are an excellent remedy for babies and should be in every home where there are young children." Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

INCONSIDERATE.

"I am wedded to music," said the opera singer.

"You evidently think so," replied the leader of the orchestra, "or you would not dare treat it as you do."

Clean Stomach, Clean Mind. — The stomach is the workshop of the vital functions and when it gets out of order the whole system clogs in sympathy. The spirits flag, the mind droops and work becomes impossible. The first care should be to restore healthful action of the stomach and the best preparation for that purpose is Parmelee's Vegetable Pills. General use for years has won them a leading place in medicine. A trial will attest their value.

this pretty couple. It follows that he makes a part of the band."

"You are wonderfully well informed," said the colonel, smiling sarcastically. "But I did not come to see your uncle for the purpose of entertaining him with the political aspect of this affair. It matters little to him, I suppose, that his former secretary does or does not conspire against the Russian government, but it concerns him, perhaps, to acquire the certainty that this gentleman is a thief. When M. de Carnoel fell into my hands, I made use of means which the police of all countries employ with prisoners. He was searched, and was found to carry on his person five packages of bank notes of ten thousand francs each."

"Just the sum taken from me. It is perfectly clear."

"Here is the amount," continued Borisoff, drawing the notes from his pocket.

"Fifty thousand francs are very easily obtained when one has the funds of a government at his disposal," muttered Maxime.

"I cannot receive this money, at least without being certain where it came from," stammered the uncle, also uncertain of the sincerity of the colonel.

"If you refuse, I shall feel compelled to give it away in charity, for it does not belong to me," said Borisoff. "But I shall prove to you that I did not bring it with me to effect the ruin of M. de Carnoel. When I asked him to account for this sum, his reply was that it had been sent to him by some one who had owed it to his father."

"That could not be," said M. Dorgeres. "His father did not leave a sou or credit of any sort. I was entrusted with the settling of his affairs, and if fifty thousand francs had been owing him I should have known of it."

"That is about what I said to the son. This son then showed me the letter accompanying it, and you may judge of the value of this justification. Here it is."

"It is not signed," said Mr. Dorgeres, glancing over it; "an anonymous restitution; such a thing is inadmissible. What do you say to it?" he added, passing the letter to his nephew.

"I think," said Maxime, "that this letter has every appearance of having been fabricated to meet the necessities of the case; by whom, I cannot tell. The paper it is written on is the kind employed by men of business."

"And the father had no friends engaged in commerce. Besides, a merchant would not reimburse to the amount of fifty thousand francs in an anonymous letter."

"From whence it follows," said Borisoff, "that the son had the letter written in case he should be under the necessity of explaining the possession of the money. I think, gentlemen, you must now be satisfied as to the morality of this agent of the Nihilists."

"Oh, completely!" exclaimed M. Dorgeres.

"Then," continued the colonel, "allow me to hand you the sum and the letter. I shall have no further business with M. de Carnoel, since I am recalled to St. Petersburg. The same despatch announces the attempt against the Czar and my disgrace,—for this unexpected recall is a disgrace. I shall no longer be employed except in Russia,

the story which the colonel interrupted. I placed in my pocket a bracelet that was found on the hand, and kept it as a means of discovering the admirable person who had abandoned it to the claws of your safe. One evening, after having exhibited it at a public ball, I met with a woman, very pretty and not at all shy, who permitted me to act as her escort, and drew me into a spot where four scoundrels, posted by her, were lying in wait to murder me and recover the bracelet. The jade after this disappeared, and I saw no more of her until some time after, when she appeared in a box at the Varietes. She gave me a cordial greeting, and accepted an invitation to supper, during which she found means to fly, carrying off the bracelet. It was then quite clear that this creature had been despatched by the thief to recover possession of a means of convicting her. Thereupon new eclipses of the damsel. She became invisible, undiscernable. Meanwhile, I discovered that Carnoel is a prisoner in Borisoff's house. Yesterday I met Borisoff with a person who appears to me suspicious. I attach myself to them—"

"I know the rest; the colonel has just told us."

"Yes; but the colonel did not tell you that the woman who fled with Carnoel was the same who twice made an attack on me because of the bracelet—the charge d'affaires of the one-handed. And now that you know all, am I right in affirming that Carnoel is the associate of these rascals?"

"Parbleu! I have no doubt of it. I am not the one to whom you must say that in order to repair the mischief you have done."

"But I intend to say the same to my cousin also."

"When? Will you wait until she dies of grief, or flies into a convent? My life is intolerable. Alice neither speaks nor eats. Vignory looks like a funeral. It is enough to drive one mad."

"I ask for twenty-four hours to make a declaration which will produce a decided effect on my cousin."

"Why this delay? She is waiting for me now. Breakfast with us."

"I will do so to-morrow if you wish, and as I am going this evening to lay hands on M. de Carnoel and his mistress—for this woman is his mistress—"

"What! you are going to arrest them. What is your profession, then?"

"Oh, I am not yet enrolled in the

I do not know the handwriting. But intimate as you were, you must know the friends of Robert de Carnoel."

"Friends—he had few," stammered Vignory. "A few college chums, and those he saw very rarely."

"Then," said the banker, "it is useless to try to find out who wrote the letter."

"I believe so, monsieur—however, if you would entrust it to me I may perhaps—"

"No, it would be waste of time: my mind is entirely made up, and I desire only to impart my conviction to—to all those who doubt still. This letter is a proof and I shall keep it."

The door opened softly, and Alice's face appeared, but seeing her father was not alone she made a movement to go out.

"Come in!" exclaimed M. Dorgeres. He concluded to profit by the presence of Maxime to strike a great blow, but reflecting that that of his cashier would embarrass his explanations with his daughter he took him aside and said:

"Be so good as to leave us. You were going to follow the advice of my half-brained nephew, but it is not a hanging matter. Go, my friend, and return to dine with us."

Alice avoided looking at him as he went out somewhat discomfited and crestfallen, but exchanging a quick glance with her cousin, she read in his eyes that he was not a bearer of good news.

"Your arrival is opportune," said M. Dorgeres; "I even regret that you did not come sooner. You would have found Col. Borisoff here."

"Then I did well not to come. That man inspires me with horror."

(To be continued.)

OUTDOOR SPORT AND ZAM-BUK.

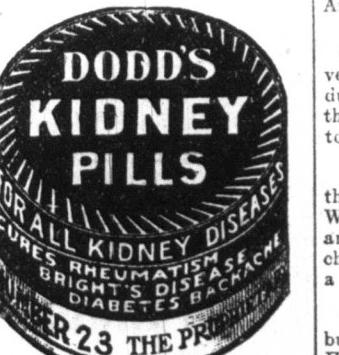

Every man or woman who loves outdoor life and exercise, should keep a box of Zam-Buk handy.

Zam-Buk is a purely herbal preparation, which, as soon as applied to cuts, bruises, burns, sprains, blisters, etc., sets up highly beneficial operations. First, its antiseptic properties render the wound free from all danger from blood poisoning. Next, its soothing properties relieve and ease the pain. Then its rich, herbal balm penetrates the tissue, and set up the wonderful process of healing. Barbed wire scratches, insect stings, heat rashes, ringworm, babies' heat sores, chafed places, sore feet—all come within Zam-Buk's power. All druggists and stores. Avoid imitations.

She—"Charlie, why are you so very much opposed to piano duets?" He—"From principle. I think it's cowardly for two persons to attack one piece of music."

Do not delay in getting relief for the little folks. Mother Graves' Worm Exterminator is a pleasant and sure cure. If you love your child why do you let it suffer when a remedy is so near at hand?

The Milkman—"I am going to buy a horseless milk wagon." The Housekeeper—"Yes; it will be so appropriate—goes so well with the cowless milk you sell."

THROW AWAY ALL YOUR FEARS

BACKACHE, GRAVEL AND RHEUMATISM VANISH BEFORE DODD'S KIDNEY PILLS.

Proved Once Again in the Case of Mrs. Fred. Krieger, Who Suffered From the Worst Forms of Kidney Disease.

Palmer Rapids, Ont., June 6—(Special)—The thousands of Canadians who live in daily terror of those terrible forms of Kidney Disease known as Backache, Gravel and Rheumatism, will be deeply interested in the story of Mrs. Fred Krieger, of this place.

"I was for years a great sufferer from Kidney Disease, Gravel, Rheumatism and Backache," Mrs. Krieger states. "It all started through a cold, but I got so my head ached, I was nervous, my limbs were heavy, I had a dragging sensation across my loins, and I was totally unfit to do anything.

"Reading about wonderful cures by Dodd's Kidney Pills led me to buy some. After using a few I found they were doing me good and this encouraged me to continue their use. Eight boxes made me well.

"I have been able to do my own work ever since and to-day I am completely cured. Dodd's Kidney Pills gave me health and I feel like a new woman."

If you keep your Kidneys strong and healthy you can never have Backache, Rheumatism or Gravel. Dodd's Kidney Pills never fail to make the Kidneys strong and well.

DEAD DOGS THAT BARK.

Electricity Applied to Throat Muscles Caused Barks.

Dr. Marage, of Paris, who a short time ago demonstrated his discovery that voice sounds are produced by the larynx exclusively, has been showing the Academy of Science that dead dogs can be made to bark and even howl most merrily. The importance of his experiments lies in his theory that in a person suffering from a lost voice a slight electric shock given the larynx may restore its muscular activity, and hence be attended by a return of voice.

While studying the functions of the larynx he hit on the curious fact that dead animals, by means of electric action on the larynx, can be made to emit the same sounds as when they were alive. He applied a feeble electric current to certain muscles of the throat of a dead dog, which immediately caused it to bark. The sound was produced evidently by a series of simple contractions of the larynx, causing a vibration. He multiplied his experiments and found that big dead hounds, for instance, could be made to emit a deep-voiced bark as if they were alive, and smaller dogs could be made to produce a long pitiful howl, such as is usually heard when they are said to be barking or howling at the moon. The various kinds of howls and barks can be produced at will by changing the electric

ENCOURAGING BIRD LIFE.

Building Houses for Bluebirds and Swallows.

What may be done in the encouragement of naturally migratory song birds to remain North during the Winter has been demonstrated at the farm house of George E. Hoxsie during the last Winter, where a colony of eleven bluebirds have contentedly lived and apparently enjoyed their quarters in the bird houses, where they were reared last Summer, says the Westerly Sun. It is quite interesting to watch their modes of living, as their habits of procuring food have to be entirely different from what they are in Summer.

Every fairly pleasant morning by the time it is light they fly away and are not seen again until near sunset, when they return individually and go into the bird houses, several occupying one house, and all in the same building.

Mr. Hoxsie is a great lover of birds and has about his place twenty-two bird houses, all of which were occupied last season, there being two nests of bluebirds and twenty nests of stump swallows. Besides these there were raised about the buildings four nests of barn swallows, one nest of chimney swallows and seven nests of eave swallows. As these would average four young birds to each nest, the number raised, with the old ones added, would make approximately 200 birds. Then there were within 500 feet of the house ten robin nests, one oriole, one waxwing, one house wren, two chipping, two ground sparrows and one king bird, making in all eighteen nests, and these young and old added would make a total of 300 insect destroying songsters that were not only a continual joy but a source of rare profit in the great number of gnats, flies, bugs and worms daily consumed.

Mr. Hoxsie attributes a big yield of apples last season to the destruction by birds of the insect pest that infects the apples from bloom to finish, having sold last Fall twenty-three barrels of fine fruit from a fifteen-year-old orchard of eighteen trees, and this without spraying. If every farmer would put up a few suitable bird houses it would soon make a vast difference to the raising of farm products.

ABOUT THE SIZE OF IT.

"Half the world doesn't know how the other half lives," said the professor, trying to be sociable.

"Yes," put in the grouch, "and what's more, it's too busy to care."

A flavoring used the same as lemon or vanilla. By dissolving granulated sugar in water and adding Mapleine, a delicious syrup is made and a syrup better than maple. Mapleine is sold by grocers. If not send 5c for 2 oz. bottle and recipe book. Crescent Mfg. Co., Seattle, Wash.

McKenzie Mine at Elk Lake Has Started Bagging Ore

Successful Operations at the Mine Which Make the Property a Coming Shipper.

ELK CITY, May 4.—With the opening of navigation, which is now in full swing, the greatest of activity prevails at the various mines and prospects in this vicinity and the city is rapidly recovering from the recent fires.

The district is likely to become another Cobalt and the veins run to depth with values. Among the shippers and properties bagging ore are the Lucky Godfrey, the Borland-Tompson, the Devlin and the Moose Horn mines.

The Moose Horn mine put in a new plant this spring and are now sinking a vein at the 125-foot level on a vein which has shown values from the surface.

In the midst of the mines is the McKenzie, a group of five properties on which work was begun last January. They have been fortunate from the start and soon hope to rank with the shippers.

The engineer in charge, Mr. Harry McMaster, reports that the vein on location #46 of the company's group at a depth of 50 feet continued steadily the whole distance and showed free silver all the way with the exception of four feet. Several hundred feet of stripping has already been done, resulting in the discovery of two additional veins, one of which is 7 inches wide, cutting at an angle of six degrees. It is the intention to continue this shaft to the 75 or 100 foot level, then drift to the McKenzie vein.

Application is being made to list this Stock on the New York Curb.

The Transfer Agents are The Trusts and Guarantees Company of Toronto and the Guarantee Security and Transfer Company of New York.

I am offering 50,000 Shares of this Stock at 25c per share, subject to prior sale. Write or wire me your subscription at once.

it to-day—better still—do it now!

FORCING A HANDICAP.

Diogenes returned from his search for an honest man.

"Given up the chase?" they inquired.

"It became a matter of necessity," replied the philosopher. "Someone stole my lantern."

The Pill That Leads Them All. — Pills are the most portable and compact of all medicines, and when easy to take are the most acceptable of preparations. But they must attest their power to be popular. As Parmelee's Vegetable Pills are the most popular of all pills they must fully meet all requirements. Accurately compounded and composed of ingredients proven to be effective in regulating the digestive organs, there is no surer medicine to be had anywhere.

"We've been having a regular clearance at home," explained Jones at his office, "throwing all sorts of old things away. I put one of my wedding presents on the fire this morning." "Did you, really?" asked a colleague. "What was it?" "A copper kettle!" replied Jones.

At the Yarmouth Y.M.C.A. Boys' Camp, held at Tusket Falls in August, I found MINARD'S LINIMENT most beneficial for sun burn, an immediate relief for colic and toothache.

ALFRED STOKES,
General Secretary.

"Isn't a lawsuit over a patent right about the dullest thing you ever saw?" "Not always. I attended a trial of that kind once that was too funny for anything. A tall lawyer named Short was reading a 6,000-word document he called a brief."

Dr. J. D. Kellogg's Dysentery Cordial is compounded specially to combat dysentery, cholera morbus and all inflammatory disorders that change of food or water may set up in the stomach and intestines. These complaints are more common in summer than in winter, but they are not confined to the warm months, as undue laxness of the bowels may seize a man at any time. Such a sufferer will find speedy relief in this Cordial.

TOO MUCH TO EXPECT.

Against an old Georgia negro, charged with stealing a pig, the evidence was absolutely conclusive, and the judge, who knew the old darky well, said reproachfully:

"Now, uncle, why did you steal this pig?"

"Because mah poor family wuz starvin', yo' honor," whispered the old man.

"Family starvin'" cried the judge. "But they told me you keep five dogs. How is that, uncle?"

"Why, yo' honor," said uncle, reprovingly, "yo' wouldn't 'spect mah family to eat dogs!"

Preferred stock, non-speculative, safe, permanent. Write for information or better still, if convenient, come and investigate for yourself.

START A TEA ROUTE TO DAY. SEND postal for circulars, or 10c for samples and terms. Alfred Tyler, London, Ont.

YOUR SUMMER OUTING.

If you are fond of fishing, canoeing, camping or the study of wild animals look up the Algonquin National Park of Ontario for your summer outing. A fish and game preserve of 2,000,000 acres interspersed with 1,200 lakes and rivers is awaiting you, offering all the attractions that Nature can bestow. Magnificent canoe trips. Altitude 2,000 feet above sea level. Pure and exhilarating atmosphere. Just the place to put in your summer holidays. Good hotel accommodation. An interesting and profusely illustrated descriptive publication telling you all about it sent free on application to Mr. J. D. McDonald, District Passenger Agent, Union Station, Toronto, Ont.

HER EXPLANATION.

Howard—Bridget, did my wife come in a few minutes ago?

Ask for Minard's and take no other.

Lady (engaging servant)—"I ought to tell you that we are all strict teetotalers here. I suppose you won't mind that?" Mary Jane—"Oh, no, mum. I've been in a reformed drunkard's family before."

It is Good for Man and Beast. — Not only is Dr. Thomas' Electric Oil of incomparable value in the household, but the farmer and stockman will find it very serviceable in the farm yard and on the cattle range, often saving the services of a veterinary surgeon. Injuries to stock and in cases of cough and pains it can be used with good effect.

If kisses were poisonous the undertakers would have to work overtime.

Minard's Liniment used by Physicians.

A clever but very eccentric man, who sings comic songs with a great deal of action, was singing one day at a concert given at a lunatic asylum. When he had finished an old woman, exclaimed, with a sigh: "And to think I'm in and he's out!"

Send for free sample to Dept. W. L., National Drug & Chemical Co., Toronto.

To My Patrons

GREETING—

As the Seed Season is nearing its close, please accept my sincere thanks for your liberal patronage, and allow me to suggest that as July 1st is practically the end, all seed accounts may be squared away by that date.

Yours respectfully,

Thos. Symington.

The Jne Bride

will appreciate your gift if you give her something in which use is combined with beauty, and right here we can supply you. Just take a look in our window if you are undecided and you will be helped to a choice.

Cut Glass

Knife Rests, Salts and Peppers, Fruit Bowls, Water Sets, and for something a little out of the ordinary we would suggest a Cut Glass Fern Pot (with silver lining).

Brass Goods

We have almost everything you could think of in this line. Fern Pots, Candle Sticks, Fire Irons. Any bride will surely be delighted with one of our individual Brass Tea Kettles.

DEATHS.

CLAPPER—At Morven, on Saturday, June 18th, 1910, George Clapper, aged 72 years.

HUFFMAN—At Kingston, on Thursday, June 16th, 1910, Thos. Huffman aged, 80 years.

SILLS—At North Fredericksburgh, on Tuesday, June 20th, 1910, Eleanor Hughes Sills, aged 80 years 9 months.

RANKIN—At Napanee, on Wednesday, June 22nd, 1910, Caroline Barbara Carnell, beloved wife of Capt. William Rankin, aged 75 years. Funeral from her late residence, South Napanee, this (Friday) afternoon at 2 o'clock. Service at the house, thence to Riverview Cemetery.

Mosquito Talcum Powder.

You use some kind of Talcum anyway, why not get the best, it's just same price and just the thing for summer use. Campers simply can't get along without it, it keeps mosquitoes off. 25c at Wallace's Drug Store.

John Simon, a well-to-do merchant of St. Catharines, says he will leave Canada and go to Buffalo because his brother, James, has been refused admission to the country.

Children Cry FOR FLETCHER'S CASTORIA

It is estimated that the Canadian Pacific Ry. C. will have a surplus of \$20,000,000 above its dividend requirements this year, and with 200,000,000 bushels of wheat to move it will have the best year in its history in almost every particular.

After five years of manual labor in a stone quarry while masquerading as a man, Miss Barbara Pring, Lafayette, Ind., has fallen in love and married just like other girls. Her husband is Charles Paul, a wealthy farmer. Her father was a quarryman, and when she was fourteen years old she was put to work, dressed in overalls and blouse. She finally was taken from her task by Rescue Mission officials.

Feed ground for 6 cents per hundred at the big mill.

J. R. Dafoe wishes to notify his customers and the public generally that the price for grinding feed at the big mill for the present and until further notice will be six cents per hundred pounds with one pound per hundred off for waste. The mill is equipped with two of the best grinding machines known to the trade with a capacity of twenty-five tons per day, feed ground as fine as desired and ready when you call for it.

Piano Solo.

The pupils of Miss N. May Hawley, assisted by Miss Thomson, vocalist, gave a very enjoyable recital in the town hall on Saturday afternoon last. A large programme was presented and every number received well merited applause. Miss Hawley is to be congratulated on the success of her pupils.

The King's Funeral.

Wonderland has secured for Saturday afternoon and evening only the finest film produced of the funeral of His late Majesty King Edward VII. Mr. Foster has to pay double the usual price for the use of this film and must return it on Saturday night. Some other extra good pictures will also be shown. Remember Saturday afternoon and evening only.

A Will Case.

In 1905 Rev. J. W. Jones, Tamworth, drew a will for Babtiste Hinchee, of Marlbank, in which he devised his entire estate to the English church at Tamworth, making Mr. Jones one of the executors. The deceased had a son, an English church clergyman in Alberta. This will was presented for probate in the Surrogate court of the County of Lennox and Addington and the son with whom the father had lived during his last years and at whose place he died, filed a caveat, against the probating of the will, claiming that the will had been obtained by undue influence and fraud, and the trial in progress at the court house is to determine whether the will in question is the true will of the late Babtiste Hinchee. W. S. Herrington, K. C. is acting for the plaintiff, and Messrs. G. F. Ruttan, K. C. and J. L. Whiting, K. C. are acting for Rev. Jones.
